Exhibit 2 - Notices, Written Comments, Transcripts, Other Communications

Add Remove View

Exhibit Sent As Paper Document

Copies of notices, written comments, transcripts, other communications. If such documents cannot be filed electronically in accordance with Instruction F, they shall be filed in accordance with Instruction G.

Exhibit 3 - Form, Report, or Questionnaire

Add Remove View

Exhibit Sent As Paper Document

Copies of any form, report, or questionnaire that the self-regulatory organization proposes to use to help implement or operate the proposed rule change, or that is referred to by the proposed rule change.

Exhibit 4 - Marked Copies

Add Remove View

The full text shall be marked, in any convenient manner, to indicate additions to and deletions from the immediately preceding filing. The purpose of Exhibit 4 is to permit the staff to identify immediately the changes made from the text of the rule with which it has been working.

Exhibit 5 - Proposed Rule Text

Add Remove View

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change.

Partial Amendment

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Nasdaq ISE, LLC (“ISE” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposed rule change to extend the delay for re-introduction of functionality which permits concurrent complex order auctions in the same complex strategy by an additional one year.

The Exchange requests that the Commission waive the 30-day operative delay period contained in Exchange Act Rule 19b-4(f)(6)(iii).³

A notice of the proposed rule change for publication in the Federal Register is attached as Exhibit 1. The text of the proposed rule change is attached as Exhibit 5.

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”) on September 19, 2017. Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to:

Angela Saccomandi Dunn
Principal Associate General Counsel

³ 17 CFR 240.19b-4(f)(6)(iii).

3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The purpose of the proposed rule change is to extend the delay for re-introduction of functionality which permits concurrent⁴ complex order auctions in the same complex strategy by an additional one year. The Exchange previously filed⁵ a rule change which delayed functionality permitting concurrent complex auctions in conjunction with a migration to the INET⁶ platform. The April 2017 Rule Change provided that with the delay, a complex order auction in a particular complex strategy would not be initiated if another complex order auction is already ongoing in that complex strategy. In conjunction with the April 2017 Rule Change, the Exchange issued an Options Trader Alert notifying Members that concurrent complex auctions would not be offered at this time.⁷

By way of background, ISE offers various complex order auctions that are designed to provide members an opportunity to trade and to potentially receive price

⁴ The current ISE Rule 722 rule text refers to these auctions as “simultaneous”. The Exchange is proposing to amend the rule text to replace the word “simultaneous” with “concurrent.” This change is designed to make the rule text more accurately describe the functionality. The functionality is not being changed.

⁵ See Securities and Exchange Act Release No. 80525 (April 25, 2017), 82 FR 20405 (May 1, 2017) (SR-ISE-2017-33) (“April 2017 Rule Change”).

⁶ INET is the proprietary core technology utilized across Nasdaq’s global markets and utilized on The Nasdaq Options Market LLC (“NOM”), Nasdaq PHLX LLC (“Phlx”) and Nasdaq BX, Inc. (“BX”) (collectively, “Nasdaq Exchanges”). The migration of ISE to the Nasdaq INET architecture resulted in higher performance, scalability, and more robust architecture.

⁷ See Options Trader Alert #2017–35.

improvement for complex orders that are entered on the Exchange, including an Exposure auction pursuant to Rule 722(b)(3)(iii), a Complex Price Improvement Mechanism (“PIM”) pursuant to Supplementary Material .09 to Rule 723, a Complex Facilitation Mechanism pursuant to Supplementary Material .08 to Rule 716, and Complex Solicited Order Mechanism also pursuant to Supplementary Material .08 to Rule 716. While only one PIM auction may be ongoing at any given time in a series or complex strategy, and PIMs are not permitted to queue or overlap in any manner,⁸ there are no similar restrictions for non-PIM auctions, and any such auctions may be processed concurrently, including in parallel with a PIM auction. For example, while the trading system would prohibit a member from entering a PIM auction when another PIM auction is already ongoing in a complex strategy, if there was an Exposure auction already running a member would be able to start a PIM, Facilitation, Solicitation, or even another Exposure auction in that strategy. This allows maximum ability of members to express their trading intent on the Exchange by permitting multiple complex order auctions in the same complex strategy to be ongoing at any particular time.

When the Exchange initially delayed this functionality, the Exchange noted in the April 2017 Rule Change that it would reintroduce concurrent complex order auctions in the same complex strategy at a later date within one year of date of the filing. The Exchange filed the initial rule change on April 17, 2017, with a one year delay, and the additional one year delay would extend the implementation timeframe for this functionality to April 17, 2019. The extended delay would provide the Exchange additional time to develop and test this functionality on INET. The Exchange will issue

⁸ See Supplementary Material .04 to Rule 723.

an Options Trader Alert notifying Members when this functionality will be available. Furthermore, in connection with this change, the Exchange also proposes to amend Rule 722 to remove language about the migration of symbols to INET as this migration has been completed and all symbols listed by the Exchange are currently trading on the INET platform.

With the delay, only one complex order auction would continue to be ongoing at any given time in a complex strategy, and such auctions would not queue or overlap in any manner. For PIM, Facilitation, or Solicitation auctions, the Exchange would continue to reject a complex order auction of the same or different auction type in a complex strategy that would be initiated while another complex order auction is ongoing in that complex strategy.⁹ In the case where a complex order auction has already been initiated in a complex strategy, an Exposure auction for an order for that strategy would continue to not be initiated and the order would be processed as a complex order that is not marked for price improvement,¹⁰ instead of rejecting the complex order. If the member requested the order to be cancelled after the exposure period, then the complex order would continue to be cancelled back to the member.

⁹ The rejection message sent to the member will contain an appropriate reason code indicating that the auction was rejected due to another ongoing complex order auction in the same complex strategy.

¹⁰ Currently, an Exposure order auction is automatically initiated when a member submits an eligible complex order that is marked for price improvement. See Rule 722(b)(3)(iii). Pursuant to Rule 722(b)(3)(iii), complex orders may be marked for price improvement, and if so marked, the complex order may be exposed on the complex order book for a period of up to one-second before being automatically executed. Members can also request that their complex orders be cancelled after the exposure period.

The Exchange believes that implementing concurrent complex order auctions in the same complex strategy at a later date will not have a significant impact on members as it is rare for multiple complex order auctions in a complex strategy to be ongoing at a particular time. This is particularly the case today due to the recent decrease in the Exchange's auction timers to 100 milliseconds.¹¹ The Exchange notes that prior to the migration to the INET platform concurrent complex order auctions in a strategy only occurred approximately 0.5% of the time that an auction runs on the Exchange. The Exchange therefore believes that the impact on Members will continue to be insignificant, and if a member does have auction eligible interest to execute when another complex order auction is ongoing, the member can either re-submit that order to the Exchange, after the auction has concluded, or submit it to another options market that provides similar auction functionality. In this regard, the Exchange notes that its market data feeds provide information to Members about when a complex order auction is ongoing, and Members can therefore use this information to make appropriate routing decisions based on applicable market conditions.

(b) Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹² in general, and furthers the objectives of Section 6(b)(5) of the Act,¹³ in particular,

¹¹ See Securities Exchange Act Release No. 79733 (January 4, 2017), 82 FR 3055 (January 10, 2017) (SR-ISE-2016-26) (permitting the Exchange to determine auction timers for PIM, Facilitation, and Solicitation within a range of 100 milliseconds and one second). Each of these auction timers are currently set to 100 milliseconds – i.e., the bottom of the range approved in the filing. Exposure auctions can be any duration up to one second (See Rule 722(b)(3)), and are also currently set to 100 milliseconds.

¹² 15 U.S.C. 78f(b).

in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest because the Exchange desires to rollout the concurrent complex order auctions functionality at a later date to allow additional time to test and implement this functionality. As proposed herein, within a year from April 17, 2018, the Exchange will offer concurrent auction functionality.

The Exchange does not anticipate that the proposed rule change will have any meaningful impact with respect to members' ability to execute complex order auctions as similar restrictions are already in place on other options exchanges.¹⁴ Concurrent complex order auctions in a complex strategy are rare, and therefore the vast majority of the time members would be able to enter a complex order auction notwithstanding the temporary delay of the implementation of concurrent auctions. With respect to Exposure auctions, in the case where another complex order auction in the same strategy has already been initiated, the Exchange proposes to allow the complex order to continue to be processed without an auction in the same manner as complex orders that are not marked for price improvement. If the Member has marked the complex order to be cancelled after the exposure period, however, the Exchange would cancel the order back

¹³ 15 U.S.C. 78f(b)(5).

¹⁴ See Phlx Rule 1098(e)(2). Nasdaq Phlx, LLC ("Phlx"), for example, does not allow the initiation of a Complex Order Live Auction ("COLA") when there is already a Price Improvement XL ("PIXL") auction already ongoing in the strategy. Similarly, Miami International Securities Exchange LLC ("MIAX") can limit the frequency of Complex Auctions by establishing a minimum time period between such auctions, and permits only one Complex Auction per strategy to be in progress at any particular time. See MIAX Rule 518(d)(2).

to the member consistent with that instruction. If the Member is not able to initiate a complex order auction because another complex order auction in the same strategy has been initiated, the Member may either re-initiate the auction after the auction concludes or submit the order to another options market that offers similar functionality. Thus, Members will be able to continue to express their trading intent regardless of the proposed delay in concurrent auction functionality.

4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impact the intense competition that exists in the options market. The Exchange does not believe that the proposed delay will impose any significant burden on inter-market competition as it does not impact the ability of other markets to offer or not offer competing functionality. The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because all Members uniformly will not be able to initiate concurrent auctions in the same complex order strategy. Within a year from April 17, 2018, the Exchange will offer concurrent complex auction functionality.

5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

6. Extension of Time Period for Commission Action

Not applicable.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

The foregoing rule change has become effective pursuant to Section

19(b)(3)(A)(iii)¹⁵ of the Act and Rule 19b-4(f)(6) thereunder¹⁶ in that it effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest, and does not impose any significant burden on competition as concurrent auctions are rare, and Members have other options for submitting their auction eligible orders when another auction is already ongoing in the complex strategy. Furthermore, the Exchange believes that the proposed rule change will not impose any significant burden on competition. Members would continue to be able to initiate complex orders auctions on the Exchange except in the rare instance that another auction in the same strategy is already taking place. Concurrent complex order auctions in a strategy will be implemented within one year from April 17, 2018 to be announced in an Options Trader Alert. Today, other options markets have similar restrictions on concurrent complex order auctions in a strategy.¹⁷ The Exchange therefore believes that the proposed rule change qualifies for immediate effectiveness as a “non-controversial” rule change.

Furthermore, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give

¹⁵ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁶ 17 CFR 240.19b-4(f)(6).

¹⁷ See note 14 above.

the Commission written notice of its intent to file a proposed rule change under that subsection at least five business days prior to the date of filing, or such shorter time as designated by the Commission. The Exchange has provided such notice.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

A proposed rule change filed under Rule 19b-4(f)(6) normally does not become operative prior to 30 days after the date of filing. Rule 19b-4(f)(6)(iii), however, permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay contained in Rule 19b-4(f)(6)(iii) so that the Exchange can extend the delay as proposed prior to the end of the current delay period, which is scheduled to end on April 17, 2018. The Exchange believes that extending the delay prior to the end of the current delay period will ensure that the Exchange's rules continue to properly reflect the delay of this functionality, which will not be available on ISE by the currently scheduled date. Delaying the reintroduction of the concurrent complex order auctions in the same complex strategy will provide additional time to test and implement this functionality.

8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

Not applicable.

9. Security-Based Swap Submissions Filed Pursuant to Section 3C of the Act

Not applicable.

10. Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing and Settlement Supervision Act

Not applicable.

11. Exhibits

1. Notice of proposed rule for publication in the Federal Register.
5. Text of the proposed rule change.

EXHIBIT 1

SECURITIES AND EXCHANGE COMMISSION
(Release No. _____ ; File No. SR-ISE-2018-40)

April __, 2018

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Extend the Delay for Re-introduction of Functionality which Permits Concurrent Complex Order Auctions

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 19, 2018, Nasdaq ISE, LLC (“ISE” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the delay for re-introduction of functionality which permits concurrent complex order auctions in the same complex strategy by an additional one year.

The text of the proposed rule change is available on the Exchange’s Website at <http://ise.cchwallstreet.com/>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the delay for re-introduction of functionality which permits concurrent³ complex order auctions in the same complex strategy by an additional one year. The Exchange previously filed⁴ a rule change which delayed functionality permitting concurrent complex auctions in conjunction with a migration to the INET⁵ platform. The April 2017 Rule Change provided that with the delay, a complex order auction in a particular complex strategy would not be initiated if another complex order auction is already ongoing in that complex strategy. In

³ The current ISE Rule 722 rule text refers to these auctions as “simultaneous”. The Exchange is proposing to amend the rule text to replace the word “simultaneous” with “concurrent.” This change is designed to make the rule text more accurately describe the functionality. The functionality is not being changed.

⁴ See Securities and Exchange Act Release No. 80525 (April 25, 2017), 82 FR 20405 (May 1, 2017) (SR-ISE-2017-33) (“April 2017 Rule Change”).

⁵ INET is the proprietary core technology utilized across Nasdaq's global markets and utilized on The Nasdaq Options Market LLC (“NOM”), Nasdaq PHLX LLC (“Phlx”) and Nasdaq BX, Inc. (“BX”) (collectively, “Nasdaq Exchanges”). The migration of ISE to the Nasdaq INET architecture resulted in higher performance, scalability, and more robust architecture.

conjunction with the April 2017 Rule Change, the Exchange issued an Options Trader Alert notifying Members that concurrent complex auctions would not be offered at this time.⁶

By way of background, ISE offers various complex order auctions that are designed to provide members an opportunity to trade and to potentially receive price improvement for complex orders that are entered on the Exchange, including an Exposure auction pursuant to Rule 722(b)(3)(iii), a Complex Price Improvement Mechanism (“PIM”) pursuant to Supplementary Material .09 to Rule 723, a Complex Facilitation Mechanism pursuant to Supplementary Material .08 to Rule 716, and Complex Solicited Order Mechanism also pursuant to Supplementary Material .08 to Rule 716. While only one PIM auction may be ongoing at any given time in a series or complex strategy, and PIMs are not permitted to queue or overlap in any manner,⁷ there are no similar restrictions for non-PIM auctions, and any such auctions may be processed concurrently, including in parallel with a PIM auction. For example, while the trading system would prohibit a member from entering a PIM auction when another PIM auction is already ongoing in a complex strategy, if there was an Exposure auction already running a member would be able to start a PIM, Facilitation, Solicitation, or even another Exposure auction in that strategy. This allows maximum ability of members to express their trading intent on the Exchange by permitting multiple complex order auctions in the same complex strategy to be ongoing at any particular time.

⁶ See Options Trader Alert #2017–35.

⁷ See Supplementary Material .04 to Rule 723.

When the Exchange initially delayed this functionality, the Exchange noted in the April 2017 Rule Change that it would reintroduce concurrent complex order auctions in the same complex strategy at a later date within one year of date of the filing. The Exchange filed the initial rule change on April 17, 2017, with a one year delay, and the additional one year delay would extend the implementation timeframe for this functionality to April 17, 2019. The extended delay would provide the Exchange additional time to develop and test this functionality on INET. The Exchange will issue an Options Trader Alert notifying Members when this functionality will be available. Furthermore, in connection with this change, the Exchange also proposes to amend Rule 722 to remove language about the migration of symbols to INET as this migration has been completed and all symbols listed by the Exchange are currently trading on the INET platform.

With the delay, only one complex order auction would continue to be ongoing at any given time in a complex strategy, and such auctions would not queue or overlap in any manner. For PIM, Facilitation, or Solicitation auctions, the Exchange would continue to reject a complex order auction of the same or different auction type in a complex strategy that would be initiated while another complex order auction is ongoing in that complex strategy.⁸ In the case where a complex order auction has already been initiated in a complex strategy, an Exposure auction for an order for that strategy would continue to not be initiated and the order would be processed as a complex order that is

⁸ The rejection message sent to the member will contain an appropriate reason code indicating that the auction was rejected due to another ongoing complex order auction in the same complex strategy.

not marked for price improvement,⁹ instead of rejecting the complex order. If the member requested the order to be cancelled after the exposure period, then the complex order would continue to be cancelled back to the member.

The Exchange believes that implementing concurrent complex order auctions in the same complex strategy at a later date will not have a significant impact on members as it is rare for multiple complex order auctions in a complex strategy to be ongoing at a particular time. This is particularly the case today due to the recent decrease in the Exchange's auction timers to 100 milliseconds.¹⁰ The Exchange notes that prior to the migration to the INET platform concurrent complex order auctions in a strategy only occurred approximately 0.5% of the time that an auction runs on the Exchange. The Exchange therefore believes that the impact on Members will continue to be insignificant, and if a member does have auction eligible interest to execute when another complex order auction is ongoing, the member can either re-submit that order to the Exchange, after the auction has concluded, or submit it to another options market that provides similar auction functionality. In this regard, the Exchange notes that its market

⁹ Currently, an Exposure order auction is automatically initiated when a member submits an eligible complex order that is marked for price improvement. See Rule 722(b)(3)(iii). Pursuant to Rule 722(b)(3)(iii), complex orders may be marked for price improvement, and if so marked, the complex order may be exposed on the complex order book for a period of up to one-second before being automatically executed. Members can also request that their complex orders be cancelled after the exposure period.

¹⁰ See Securities Exchange Act Release No. 79733 (January 4, 2017), 82 FR 3055 (January 10, 2017) (SR-ISE-2016-26) (permitting the Exchange to determine auction timers for PIM, Facilitation, and Solicitation within a range of 100 milliseconds and one second). Each of these auction timers are currently set to 100 milliseconds – i.e., the bottom of the range approved in the filing. Exposure auctions can be any duration up to one second (See Rule 722(b)(3)), and are also currently set to 100 milliseconds.

data feeds provide information to Members about when a complex order auction is ongoing, and Members can therefore use this information to make appropriate routing decisions based on applicable market conditions.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹² in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest because the Exchange desires to rollout the concurrent complex order auctions functionality at a later date to allow additional time to test and implement this functionality. As proposed herein, within a year from April 17, 2018, the Exchange will offer concurrent auction functionality.

The Exchange does not anticipate that the proposed rule change will have any meaningful impact with respect to members' ability to execute complex order auctions as similar restrictions are already in place on other options exchanges.¹³ Concurrent complex order auctions in a complex strategy are rare, and therefore the vast majority of

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

¹³ See Phlx Rule 1098(e)(2). Nasdaq Phlx, LLC ("Phlx"), for example, does not allow the initiation of a Complex Order Live Auction ("COLA") when there is already a Price Improvement XL ("PIXL") auction already ongoing in the strategy. Similarly, Miami International Securities Exchange LLC ("MIAX") can limit the frequency of Complex Auctions by establishing a minimum time period between such auctions, and permits only one Complex Auction per strategy to be in progress at any particular time. See MIAX Rule 518(d)(2).

the time members would be able to enter a complex order auction notwithstanding the temporary delay of the implementation of concurrent auctions. With respect to Exposure auctions, in the case where another complex order auction in the same strategy has already been initiated, the Exchange proposes to allow the complex order to continue to be processed without an auction in the same manner as complex orders that are not marked for price improvement. If the Member has marked the complex order to be cancelled after the exposure period, however, the Exchange would cancel the order back to the member consistent with that instruction. If the Member is not able to initiate a complex order auction because another complex order auction in the same strategy has been initiated, the Member may either re-initiate the auction after the auction concludes or submit the order to another options market that offers similar functionality. Thus, Members will be able to continue to express their trading intent regardless of the proposed delay in concurrent auction functionality.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impact the intense competition that exists in the options market. The Exchange does not believe that the proposed delay will impose any significant burden on inter-market competition as it does not impact the ability of other markets to offer or not offer competing functionality.

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because all Members uniformly will not be able to initiate concurrent auctions in the same complex order strategy. Within a year from April 17, 2018, the Exchange will offer concurrent complex auction functionality.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

¹⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-ISE-2018-40 on the subject line.

Paper comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-ISE-2018-40. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing

also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-ISE-2018-40 and should be submitted on or before [insert date 21 days from publication in the Federal Register].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Eduardo A. Aleman
Assistant Secretary

¹⁶ 17 CFR 200.30-3(a)(12).

Rule 722. Complex Orders

* * * * *

[ISE will migrate symbols to the INET platform pursuant to a symbol migration commencing in the second quarter of 2017. For symbols that have migrated to the INET platform, o]Only one complex order auction pursuant to Supplementary Material .08 to Rule 716, Rule 722(b)(3)(iii), and Supplementary Material .09 to Rule 723 may be ongoing at any given time in a complex strategy. Such complex order auctions will not queue or overlap in any manner. The Exchange will reject a complex order auction of the same or different auction type submitted pursuant to Supplementary Material .08 to Rule 716 or Supplementary Material .09 to Rule 723 while another complex order auction is ongoing in that complex strategy. When there is an ongoing auction in a complex strategy, a subsequent complex order for that strategy will not initiate an auction pursuant to Rule 722(b)(3)(iii) and will be processed as a complex order that is not marked for price improvement, unless the member requested the order to be cancelled after the exposure period, in which case the complex order will be cancelled back to the member. [The Exchange will specify the symbol migration schedule in an Options Trader Alert to be issued by the Exchange.] The Exchange will recommence [simultaneous]concurrent complex order auctions on or before April 17, 2019, [ISE within one year from the date of the filing of SR-ISE-2017-33] to be announced in a separate Options Trader Alert.

(a) and (b) No change.

Supplementary Material to Rule 722

.01 - .07 No change.
