The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

Partial Amendment

Add Remove View

--

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Nasdaq ISE, LLC (“ISE” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposal to: (i) adjust fees for ISE Open/Close End of Day and Intraday Trade Profile; (ii) reduce fees for 36 months of historical data for current customers; and (iii) allow unlimited external distribution of ISE Open/Close End of Day and Intraday Trade Profile for a fixed monthly fee.

A notice of the proposed rule change for publication in the Federal Register is attached as Exhibit 1.

The text of the proposed rule change is attached as Exhibit 5

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”). Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to:

Daniel A. Cantu
Principal Associate General Counsel
Nasdaq, Inc.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

3. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The purpose of the proposed rule change is to: (i) adjust fees for ISE Open/Close End of Day and Intraday Trade Profile; (ii) reduce fees for 36 months of historical data for current customers; and (iii) allow unlimited external distribution of ISE Open/Close End of Day and Intraday Trade Profile for a fixed monthly fee.³

ISE Open/Close Trade Profile

ISE currently sells a market data offering comprised of the entire opening and closing trade data of ISE-listed options of both customers and firms, called the ISE Open/Close Trade Profile.⁴ This product is designed to provide data to subscribers regarding investor sentiment and trading activity. Primary fields are trade type, put or call, trade quantity and trade volume for every options series listed and traded in which an electronic trade occurred during the trading day. The information provided is designed to provide the ability to analyze option trade and volume data and create and

³ This proposal was initially filed on July 1, 2024, as SR-ISE-2024-31. On July 15, 2024, that filing was withdrawn and refiled to provide additional information.

⁴ See Securities Exchange Act Release No. 77907 (May 25, 2016), 81 FR 35079 (June 1, 2016) (SR-ISE-2016-14) (adopting a flat fee for the Complete Set of historical data); Securities Exchange Act Release No. 76501 (November 20, 2015), 80 FR 74181 (November 27, 2015) (SR-ISE-2015-40) (offering a one month free trial to new customers); Securities Exchange Act Release No. 67955 (October 1, 2012), 77 FR 61037 (October 5, 2012) (SR-ISE-2012-76) (adopting reduced fees for historical data for academic institutions); Securities Exchange Act Release No. 61317 (January 8, 2010), 75 FR 2915 (January 19, 2010) (SR-ISE-2009-103) (establishing the current fees for the end of day and intra-day products); Securities Exchange Act Release No. 60859 (October 21, 2009), 74 FR 55610 (October 28, 2009) (SR-ISE-2009-64) (adjusting fees for academic institutions); Securities Exchange Act Release No. 60654 (September 11, 2009), 74 FR 47848 (September 17, 2009) (SR-ISE-2009-64) (adjusting fees for academic institutions); Securities Exchange Act Release No. 56957 (December 13, 2007), 72 FR 71988 (December 19, 2007) (SR-ISE-2007-115) (establishing the sale of historical data); Securities Exchange Act Release No. 56254 (August 15, 2007), 72 FR 47104 (August 22, 2007) (SR-ISE-2007-70) (initial offering of ISE Open/Close Trade Profile).

test trading models and analytical strategies, as well as build customized sentiment indicators.

ISE Open/Close Trade Profile provides customers with the ability to create and test trading models and analytic strategies and build customized sentiment indicators using the following data fields:

- Aggregate number of buy and sell transactions in the affected series;
- Aggregate volume traded electronically on the Exchange in the affected series;
- Aggregate number of trades effected on the Exchange to open a position;
- Aggregate number of trades effected on the Exchange to close a position;
- Origin of the orders involved in trades on the Exchange in the affected series during a particular trading session, specifically aggregated in the following categories of participants: Customers, broker-dealers, market makers, and Professionals.

Information on the quantity of trades is subdivided according to the quantity of contracts (less than 100, 100-199, and greater than 200).

ISE Open/Close Trade Profile is available in End of Day and Intraday files. The End of Day file is updated during an overnight process with additional fields and is available the following morning.

The Intraday product is captured in “snapshots” taken every 10 minutes throughout the trading day, available to subscribers within 2 minutes of the conclusion of each period. Subscribers receive the first calculation at 9:42 a.m. ET, representing data captured from 9:30 a.m. to 9:39 a.m., and the second calculation at 9:52 a.m.,

representing data from both the most recent snapshot and previous snapshots, continuing over the course of the trading day.

The current subscription rate for both members and non-members for ISE Trade Profile Open/Close End of Day is \$750 per month. The current fee for ISE Open/Close Trade Profile Intraday is \$2,000 per month. An annual subscription for end of day and Intraday Trade Profile is \$2,500 per month. These fees have not changed since 2010.⁵

ISE also sells historical ISE Open/Close Trade Profile data about the past activity of all option series traded on the Exchange for each trading session conducted during a prior calendar month selected by the subscriber. This data is intended to enhance a purchaser's ability to analyze option trade and volume data, evaluate historical trends in the trading activity of a particular option series, and create and test trading models and analytical strategies. Historical Trade Profile provides the same fields of information as the End of Day and Intraday files, respectively. This market data offering is comprised of the entire opening and closing trade data of both customers and firms starting in January 2006 for End of Day and October 2009 for Intraday. Ad-hoc subscribers can purchase this data for any number of months through the current month.

Trade Profile is designed to enhance the ability of customers to understand market sentiment on the Exchange and to create and test trading models and analytical strategies useful in both options and equities markets. It is not necessary to execute a trade, but it supplies the customer with information about underlying market trends designed to

⁵ See Securities Exchange Act Release No. 61317 (January 8, 2010), 75 FR 2915 (January 19, 2010) (SR-ISE-2009-103) (establishing the current fees for the end of day and intra-day products).

improve the quality of that customer's investment decisions. Customers can, and often do, elect to forego this information.

Products similar to Trade Profile have been available on multiple exchanges for many years and are well-established in the market. Such products are available from Nasdaq Phlx LLC ("Phlx"),⁶ Nasdaq Options Market ("NOM"),⁷ Nasdaq GEMX LLC ("GEMX"),⁸ Cboe Options Exchange,⁹ NYSE American Options,¹⁰ NYSE Arca Options,¹¹ BOX Options Market LLC,¹² MIAX Pearl Options Exchange,¹³ and others. In general, the relative value of these products depends on the volume of transactions included; the greater the volume of transactions, the greater the value of the data. The current purchasers of Trade Profile are investment banks, market makers, asset managers and other buy-side investors.

¹³ See, e.g., Securities Exchange Act Release No. 91964 (May 21, 2021), 86 FR 28667 (May 27, 2021) (SR-PEARL-2021-24) (introducing the Open-Close Report).

Proposed Changes

Fee Changes for End of Day and Intraday Products

The Exchange proposes to increase the fee for the End of Day product from \$750 to \$850, and the Intraday Product from \$2,000 to \$2,500. The discounted rate of \$2,500 per month for both end of day and intraday information will be increased to \$3,100 to reflect the new fees while preserving the \$250 discount.

Discount for Historical Data

The Exchange proposes to alter discounts for historical end of day and intraday data for current Distributors.¹⁴ Specifically, the Exchange proposes to offer the most recent 36 months of end of day data for \$7,200, and the most recent 36 months intraday data for \$12,000.

Ad-hoc requests for historical end of day data are currently \$600 per request per month. A complete set of historical end of day data is \$27,500 per request. For intraday data, there is a sliding scale of charges: \$1,000 per request per month; \$2,000 per request per quarter; and \$8,000 per request per year.

The proposed rates are a substantial discount from current fees. With respect to end of day data, ad hoc requests are \$600 per request per month. Three years of such data would cost \$21,600. The proposed rate of \$7,200 is far below this level. With respect to intraday information, the current rates are \$1,000 per request per month, \$2,000 per request per quarter, and \$8,000 per request per year. Using the lowest rate of \$8,000 per request per year, the most recent 36 months of intraday information would

¹⁴ A “Distributor” is any firm that receives Trade Profile information and then distributes it internally

cost \$24,000. The proposed rate of \$12,000 for the most recent 36 months of intraday data is a substantial discount from the current rate.

For customers that request more than three years of information, end of day historical information can still be purchased for \$600 per request per month, and intraday information can be purchased at \$1,000 per request per month. The discount for a complete set of historical end of day data is \$27,500 per request is being removed because the Exchange has found that the most recent three years of data is sufficient for most customer needs. Many customers use historical data to test their strategies and models, and our discussions with current and former customers and experience indicate that 36 months of data is sufficient for most customer needs, and is an effective baseline for review.

The historical data will continue to provide the same categories of information available for current subscribers under the new proposal.

Eligibility for the discount will depend on the type of current subscription. A current purchaser of End of Day data would be eligible for the historical End of Day product at the reduced rate. A current purchaser of the Intraday product would similarly be able to purchase the historical Intraday product at the reduced rate. A purchaser of both the current End of Day and Intraday products would be entitled to purchase both types of history at the reduced rate.

The 36-month period will be based on the date of purchase of the 36 months of data by a current distributor. For example, a customer that buys the End of Day product for the first time in July 2024 would also be able to purchase historical End of Day data for the period July 2021 through July 2024 (inclusive) at the discounted rate. Similarly, a

customer with an existing End of Day subscription in July 2024 would be able to purchase the historical End of Day data from July 2021 through July 2024 at the discounted rate. The same reasoning would apply to Intraday customers.¹⁵

The fees for historical data are linked to the current product because effective historical testing requires a comparison of similar licenses. Effective testing of the End of Day product, for example, requires End of Day historical data, and the same would hold true for Intraday data.

The Exchange proposes to remove the fee of \$2,000 per request per quarter and \$8,000 per request per year as no longer useful in light of the much lower discount being proposed for 36 months of historical data.

Historical data is useful in analyzing option trade and volume data, evaluating historical trends in the trading activity of a particular option series, and creating and testing trading models and analytical strategies, and is often purchased concurrently with a new subscription to ISE Open/Close Trade Profile. Many customers use historical data to test their strategies and models, and our discussions with current and past customers and experience indicate that 36 months of data is sufficient for most customer needs, and is an effective baseline for review.

External Distribution of Derived Data

The Exchange proposes to offer a license for the unlimited external distribution of Derived Data from ISE Trade Profile for \$4,500 per month. Derived Data is “any

¹⁵ A customer may use the proposed historical data discount more than once. For example, a Current Distributor that purchases 36 months of historical data at a discount, but later terminates that subscription, would be eligible to purchase another 36 months of historical data (based on the date of purchase) upon renewing that subscription. (Current Distributors that never terminate would have no need for a second purchase, as they would already possess the most recent months of historical data.).

information generated in whole or in part from Exchange Information¹⁶ such that the information generated cannot be reverse engineered to recreate Exchange Information, or be used to create other data that is recognizable as a reasonable substitute for such Exchange Information.”

Fees for external distribution of Derived Data from ISE Trade Profile are in addition to fees for the End of Day product or the Intraday product, or both, as applicable.

This is a new license to be offered by the Exchange; external distribution of Derived Data is not currently permitted. The proposal, based on a similar license offered by the Phlx Exchange,¹⁷ will allow the external distribution of analytic products derived from ISE Trade Profile to the general investing public. A similar product is also being proposed for the Nasdaq Options Market and the GEMX Exchange.

Experience with the Phlx Exchange indicates that this license provides an effective mechanism for market data vendors to identify, develop, and sell derived market data products, such as sentiment indicators, harnessing the power of the competitive marketplace to promote innovation. The Exchange expects that this product will have the greatest utility for the general investing public.

¹⁶ “Exchange Information” is any data or information that has been collected, validated, processed and/or recorded by the Exchange and made available for transmission relating to: (i) Eligible securities or other financial instruments, markets, products, vehicles, indicators, or devices; (ii) activities of the Exchange; or (iii) other information or data from the Exchange. Information includes, but is not limited to, any element of information used or processed in such a way that Exchange Information or a substitute for such Information can be identified, recalculated or re-engineered from the processed information.

¹⁷ See Securities Exchange Act Release No. 93293 (October 12, 2021), 86 FR 57716 (October 18, 2021) (SR-Phlx-2021-58).

b. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁸ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁹ in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Equitable Allocation of Reasonable Dues, Fees and Other Charges

The proposed changes are an equitable allocation of reasonable dues, fees and other charges because: (i) the trade profile products offered by multiple exchanges are substitutes, and customers are free to choose which product they purchase; and (ii) the proposed fees are comparable to the fees charged by other exchanges, and customers are free to purchase other products if the Exchange has mistaken the value of its product.

Substitution

As noted above, products similar to Trade Profile have been available on multiple exchanges for many years and are well-established in the market. Such products are

¹⁸ 15 U.S.C. 78f(b).

¹⁹ 15 U.S.C. 78f(b)(4) and (5).

available from Phlx,²⁰ ISE,²¹ GEMX,²² Cboe,²³ NYSE American,²⁴ NYSE Arca,²⁵ BOX,²⁶ MIAAX Pearl,²⁷ and others.

Trade outline products offer the same categories of data through end of day or intraday reports. The information provided by one exchange is generally similar to that provided by other exchanges because order flow can move from one exchange to another, and market sentiment trends that appear on one exchange are likely to be similar to the sentiment trends on other exchanges. The key differentiator in the quality of the data depends on the volume of transactions on a given exchange; the greater the volume of transactions, the greater the value of the data. Customers can choose not to purchase the trade outline product of one exchange and substitute it for that of another exchange.

²⁰ See Securities Exchange Act Release No. 62887 (September 10, 2010), 75 FR 57092 (September 17, 2010) (SR-Phlx-2010-121) (introducing PHOTO on September 1, 2010),

²¹ See Nasdaq ISE Rules, Options 7, Section 10(A) and (B) (Nasdaq ISE Open/Close Trade Profile End of Day; Nasdaq ISE Open/Close Trade Profile Intra-day).

²² See Nasdaq GEMX Rules, Options 7, Sections 7(D) (Nasdaq GEMX Open/Close End of Day Trade Profile) and 7(E) (Nasdaq GEMX Open/Close Intra-day Trade Profile)

²³ See, e.g., Securities Exchange Act Release No. 94913 (May 13, 2022), 87 FR 30534 (May 19, 2022) (SR-Cboe-2022-023) (describing End of Day and Intra-day Open-Close Data as a summary of trading activity on the exchange at the option level by origin, side of the market, price and transaction type).

²⁴ See, e.g., Securities Exchange Act Release No. 93803 (December 16, 2021, 86 FR 72647 (December 22, 2021) (SR-NYSEAMER-2021-46) (describing the NYSE Options Open-Close Volume Summary as a volume summary of trading activity on the exchange at the option level by origin, side of the market, contract volume and transaction type).

²⁵ See, e.g., Securities Exchange Act Release No. 93132 (September 27, 2021), 86 FR 54499 (October 1, 2021) (SR-NYSEArca-2021-82) (describing the NYSE Options Open-Close Volume Summary as a volume summary of trading activity on the exchange at the option level by origin, side of the market, contract volume and transaction type).

²⁶ See, e.g., Securities Exchange Act Release No. 97174 (March 21, 2023), 88 FR 18201 (March 27, 2023) (SR-BOX-2023-09) (describing the BOX exchange Open-Close Data report as providing volume by origin, buying/selling, and opening/closing criteria).

²⁷ See, e.g., Securities Exchange Act Release No. 91964 (May 21, 2021), 86 FR 28667 (May 27, 2021) (SR-PEARL-2021-24) (introducing the Open-Close Report).

Customers can also choose not to purchase a trade outline product at all. Trade outline products are designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade. Customers can, and do, choose to forego the information from Trade Profile or any of its competitor products when making a trade.

Nasdaq and its affiliates have observed that customers purchase sufficient data to provide a view of the market, but not more, as the value of data from each additional exchange yields diminishing returns. As a result, all exchanges are limited in what they will be able to charge for a trade outline product.

As the Commission and courts²⁸ have recognized, “[i]f competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.”²⁹ Accordingly, “the existence of significant competition provides a substantial basis for finding that the terms of an exchange’s fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.”³⁰ The Commission and the courts have repeatedly expressed their

²⁸ The decision of the United States Court of Appeals for the District of Columbia Circuit in NetCoalition v. SEC, 615 F.3d 525 (D.C. Cir. 2010) upheld the Commission’s reliance upon competitive markets to set reasonable and equitably allocated fees for market data. “In fact, the legislative history indicates that the Congress intended that the market system evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed and that the SEC wield its regulatory power in those situations where competition may not be sufficient, such as in the creation of a consolidated transactional reporting system.” NetCoalition I at 535 (quoting H.R. Rep. No. 94-229, at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 321, 323) (internal quotation marks omitted). The court agreed with the Commission’s conclusion that “Congress intended that competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.” Id. (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74771 (December 9, 2008) (SR-NYSEArca-2006-21)).

²⁹ See Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770 (December 9, 2008) (SR-NYSEArca-2006-21).

³⁰ See id.

preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues, and also recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”³¹ Trade Profile is in direct competition with multiple exchanges that offer similar products in end of day and intraday formats.³²

The license to allow the external distribution of Derived Data, like the purchase of the end of day and intraday licenses, is also subject to competition. Any exchange that wishes to allow distribution of a Derived Data product based on options trading information would be able to do so with an immediately effective fee filing similar to this proposal.

Moreover, as explained above, the proposal is designed to promote the dissemination of a variety of analytical insights—generally used only by investment banks, market makers, asset managers and other buy-side investors—to the general investing public by creating an incentive for market data vendors to identify, develop, and sell such indicators. As such, the proposal will spur competition among not only exchanges, but vendors as well.

³¹ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (“Regulation NMS Adopting Release”).

³² These substitute products include: NOTO, ISE Trade Profile, GEMX Trade Profile data; open-close data from Cboe C1, C2, BZX, and EDGX; and Open Close Reports from MIAX Options, Pearl, and Emerald.

The discounted fees for historical data and the \$250 discount for the purchase of both end of day and intraday data together, like the purchase of the end of day, intraday and Derived Data licenses, is also subject to competition. Any exchange that wishes to provide discounts for historical data or the joint usage of end of day and intraday information would be able to do so with an immediately effective fee filing in response.

Comparability of Proposed Fees

The proposed fees are comparable to the fees charged by similarly-situated exchanges.

As explained above, the value of Trade Profile is determined in part by the number of underlying transactions reflected in the data.

ISE has a market share comparable to NYSE American, MIAX, and MIAX Pearl at approximately 6% to 7% in the second quarter of 2024.³³ For intraday products, NYSE American charges \$2,000,³⁴ MIAX charges \$2,000,³⁵ and MIAX Pearl charges \$2,000.³⁶ The proposed fees of \$2,500 for ISE are above this because ISE believes that the other exchanges are not accurately reflecting the value of the data. CBOE C1, at a

³⁵ See MIAX Options Exchange, “Fee Schedule as of April 23, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_04232024.pdf

³⁶ See MIAX Pearl Options Exchange, “Fee Schedule as of April 15, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Options_Fee_Schedule_04152024.pdf

slightly larger market share of approximately 9%,³⁷ charges \$3,000 for intraday data,³⁸ and we believe the proposed fee of \$2,500 is more in line with the overall market for trade outline information than the \$2,000 charged by other exchanges.

For end of day data, NYSE American charges \$750,³⁹ MIAX charges \$600,⁴⁰ and MIAX Pearl charges \$600.⁴¹ The proposed fees of \$850 are higher than this range, but the Exchange believes that its competitors are underestimating the value of the product.

Nasdaq is not aware of another exchange that provides a similar discount for historical data other than its own affiliates.

If the Exchange is wrong in either of these assessments, it will lose sales as a result.

The Proposal Does Not Permit Unfair Discrimination

Nothing in the proposal treats any category of market participant any differently from any other category of market participant. On the contrary, the proposal expands distribution of Trade Profile beyond investment banks, market makers, asset managers and other buy-side investors to market data vendors and the general investing public. Allowing the distribution of Derived Data to the general investing public will broaden the

⁴⁰ See MIAX Options Exchange, “Fee Schedule as of April 23, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_04232024.pdf

⁴¹ See MIAX Pearl Options Exchange, “Fee Schedule as of April 15, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Options_Fee_Schedule_04152024.pdf

availability of such information while not treating any current recipient of the product differently in any way. The new fee structure, which modifies fees to reflect current market value and offers historical data at a discount, applies equally to all current and potential distributors. Trade Profile is available to all market participants, including members and non-members, and all market participants receive the same information in the Trade Profile data feed.

With respect to the specific fee changes, it is reasonable and not unfair discrimination to charge an external distributor of Derived Data a \$4,500 licensing fee. Vendors will ordinarily charge a fee to their downstream customers for this service, and, even if the vendor is not charging a specific fee for this particular service, Derived Data products from the Exchange will be part of a suite of offerings that generally promote sales. External distribution is fundamentally different than internal use, in that the former generates revenue from external sales while the latter does not. It is not unfair discrimination to charge a licensing fee for a product that generates downstream revenue.

Nor is it unfair discrimination to allow the redistribution of Derived Data, but not the underlying information, to the general investing public. As explained above, neither exchanges nor vendors ordinarily allow redistribution of analytic products—such products are typically designed solely for the use of direct customers, not for redistribution to the customers of customers in the manner of a data feed. Allowing the redistribution of Derived Data provides an incentive for vendors to innovate with new compelling and varied analytic products for the general investing public that will provide access to market sentiment insights currently available only to sophisticated investors.

This proposal is therefore not unfair discrimination, but rather allows for more equitable access to market sentiment information to the general investing public.

It is also not unfair discrimination to provide a discount for 36 months of historical data to current distributors, but not former distributors or firms that have never purchased the product. Any firm would be able to become a current distributor at any time by subscribing to Trade Profile, and would be able to cancel the subscription at any time after receiving the 36 months of historical data for the proposed discounted fee. It is not unfair discrimination to limit the historical data discount to current distributors. Historical information is generally used by current users to test their strategies and trading models, and they are therefore in the best position to benefit from the historical data. Firms that do not currently receive the service would have less use for the information, although, to the extent that they find such information useful, they would still be able to purchase the information on an ad hoc basis without a current subscription.

For all of these reasons, the proposal does not permit unfair discrimination.

4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of intermarket competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees

in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

Intermarket Competition

Nothing in the proposal burdens inter-market competition (the competition among self-regulatory organizations).

As discussed above, Trade Profile is subject to direct competition from other options exchanges that offer substitutes. Any of these exchanges can replicate this proposal in full or in part, and nothing in the proposal would interfere with the ability of any exchange to do so.

Intra-market Competition

Nothing in the proposal burdens intra-market competition (the competition among consumers of exchange data). Trade Profile is available to any customer under the same fee schedule as any other customer, and any market participant that wishes to purchase these products can do so on a non-discriminatory basis. Indeed, the proposal will foster competition by expanding dissemination of data to vendors and the general investing public, and by encouraging more market participants to use Trade Profile data to help inform their investments strategies and analytic models.

Offering the 36 months of historical data to current distributors, but not former distributors or firms that have never purchased the product, will not burden competition because non-subscribers are free to purchase a current subscription or purchase historical data on an ad hoc basis.

5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

6. Extension of Time Period for Commission Action

Not applicable.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

Pursuant to Section 19(b)(3)(A)(ii) of the Act,⁴² the Exchange has designated this proposal as establishing or changing a due, fee, or other charge imposed by the self-regulatory organization on any person, whether or not the person is a member of the self-regulatory organization, which renders the proposed rule change effective upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

Not applicable.

EXHIBIT 1

SECURITIES AND EXCHANGE COMMISSION
(Release No. _____ ; File No. SR-ISE-2024-32)

July_2024

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Modify Fees for ISE Trade Profile

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹, and Rule 19b-4 thereunder,² notice is hereby given that on July 15, 2024, Nasdaq ISE, LLC (“ISE” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to: (i) adjust fees for ISE Open/Close End of Day and Intra-day Trade Profile; (ii) reduce fees for 36 months of historical data for current customers; and (iii) allow unlimited external distribution of ISE Open/Close End of Day and Intra-day Trade Profile for a fixed monthly fee.

The text of the proposed rule change is available on the Exchange’s Website at <https://listingcenter.nasdaq.com/rulebook/ise/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to: (i) adjust fees for ISE Open/Close End of Day and Intraday Trade Profile; (ii) reduce fees for 36 months of historical data for current customers; and (iii) allow unlimited external distribution of ISE Open/Close End of Day and Intraday Trade Profile for a fixed monthly fee.³

ISE Open/Close Trade Profile

ISE currently sells a market data offering comprised of the entire opening and closing trade data of ISE-listed options of both customers and firms, called the ISE Open/Close Trade Profile.⁴ This product is designed to provide data to subscribers

³ This proposal was initially filed on July 1, 2024, as SR-ISE-2024-31. On July 15, 2024, that filing was withdrawn and refiled to provide additional information.

⁴ See Securities Exchange Act Release No. 77907 (May 25, 2016), 81 FR 35079 (June 1, 2016) (SR-ISE-2016-14) (adopting a flat fee for the Complete Set of historical data); Securities Exchange Act Release No. 76501 (November 20, 2015), 80 FR 74181 (November 27, 2015) (SR-ISE-2015-40) (offering a one month free trial to new customers); Securities Exchange Act Release No. 67955 (October 1, 2012), 77 FR 61037 (October 5, 2012) (SR-ISE-2012-76) (adopting reduced fees for historical data for academic institutions); Securities Exchange Act Release No. 61317 (January 8, 2010), 75 FR 2915 (January 19, 2010) (SR-ISE-2009-103) (establishing the current fees for the end of day and intra-day products); Securities Exchange Act Release No. 60859 (October 21, 2009), 74 FR 55610 (October 28, 2009) (SR-ISE-2009-64) (adjusting fees for academic institutions); Securities Exchange Act Release No. 60654 (September 11, 2009), 74 FR 47848 (September 17, 2009) (SR-ISE-2009-64) (adjusting fees for academic institutions); Securities Exchange Act Release No. 56957 (December 13, 2007), 72 FR 71988 (December 19,

regarding investor sentiment and trading activity. Primary fields are trade type, put or call, trade quantity and trade volume for every options series listed and traded in which an electronic trade occurred during the trading day. The information provided is designed to provide the ability to analyze option trade and volume data and create and test trading models and analytical strategies, as well as build customized sentiment indicators.

ISE Open/Close Trade Profile provides customers with the ability to create and test trading models and analytic strategies and build customized sentiment indicators using the following data fields:

- Aggregate number of buy and sell transactions in the affected series;
- Aggregate volume traded electronically on the Exchange in the affected series;
- Aggregate number of trades effected on the Exchange to open a position;
- Aggregate number of trades effected on the Exchange to close a position;
- Origin of the orders involved in trades on the Exchange in the affected series during a particular trading session, specifically aggregated in the following categories of participants: Customers, broker-dealers, market makers, and Professionals.

Information on the quantity of trades is subdivided according to the quantity of contracts (less than 100, 100-199, and greater than 200).

2007) (SR-ISE-2007-115) (establishing the sale of historical data); Securities Exchange Act Release No. 56254 (August 15, 2007), 72 FR 47104 (August 22, 2007) (SR-ISE-2007-70) (initial offering of ISE Open/Close Trade Profile).

ISE Open/Close Trade Profile is available in End of Day and Intraday files. The End of Day file is updated during an overnight process with additional fields and is available the following morning.

The Intraday product is captured in “snapshots” taken every 10 minutes throughout the trading day, available to subscribers within 2 minutes of the conclusion of each period. Subscribers receive the first calculation at 9:42 a.m. ET, representing data captured from 9:30 a.m. to 9:39 a.m., and the second calculation at 9:52 a.m., representing data from both the most recent snapshot and previous snapshots, continuing over the course of the trading day.

The current subscription rate for both members and non-members for ISE Trade Profile Open/Close End of Day is \$750 per month. The current fee for ISE Open/Close Trade Profile Intraday is \$2,000 per month. An annual subscription for end of day and Intraday Trade Profile is \$2,500 per month. These fees have not changed since 2010.⁵

ISE also sells historical ISE Open/Close Trade Profile data about the past activity of all option series traded on the Exchange for each trading session conducted during a prior calendar month selected by the subscriber. This data is intended to enhance a purchaser’s ability to analyze option trade and volume data, evaluate historical trends in the trading activity of a particular option series, and create and test trading models and analytical strategies. Historical Trade Profile provides the same fields of information as the End of Day and Intraday files, respectively. This market data offering is comprised of the entire opening and closing trade data of both customers and firms starting in

⁵ See Securities Exchange Act Release No. 61317 (January 8, 2010), 75 FR 2915 (January 19, 2010) (SR-ISE-2009-103) (establishing the current fees for the end of day and intra-day products).

January 2006 for End of Day and October 2009 for Intraday. Ad-hoc subscribers can purchase this data for any number of months through the current month.

Trade Profile is designed to enhance the ability of customers to understand market sentiment on the Exchange and to create and test trading models and analytical strategies useful in both options and equities markets. It is not necessary to execute a trade, but it supplies the customer with information about underlying market trends designed to improve the quality of that customer's investment decisions. Customers can, and often do, elect to forego this information.

Products similar to Trade Profile have been available on multiple exchanges for many years and are well-established in the market. Such products are available from Nasdaq Phlx LLC ("Phlx"),⁶ Nasdaq Options Market ("NOM"),⁷ Nasdaq GEMX LLC ("GEMX"),⁸ Cboe Options Exchange,⁹ NYSE American Options,¹⁰ NYSE Arca

⁶ See Securities Exchange Act Release No. 62887 (September 10, 2010), 75 FR 57092 (September 17, 2010) (SR-Phlx-2010-121) (introducing PHOTO on September 1, 2010),

⁷ See Nasdaq Stock Market Rules, Options 7, Section 4 (Nasdaq Options Market Data Distributor Fees).

⁸ See Nasdaq GEMX Rules, Options 7, Sections 7(D) (Nasdaq GEMX Open/Close End of Day Trade Profile) and 7(E) (Nasdaq GEMX Open/Close Intra-day Trade Profile)

⁹ See, e.g., Securities Exchange Act Release No. 94913 (May 13, 2022), 87 FR 30534 (May 19, 2022) (SR-Cboe-2022-023) (describing End of Day and Intra-day Open-Close Data as a summary of trading activity on the exchange at the option level by origin, side of the market, price and transaction type).

¹⁰ See, e.g., Securities Exchange Act Release No. 93803 (December 16, 2021, 86 FR 72647 (December 22, 2021) (SR-NYSEAMER-2021-46) (describing the NYSE Options Open-Close Volume Summary as a volume summary of trading activity on the exchange at the option level by origin, side of the market, contract volume and transaction type).

Options,¹¹ BOX Options Market LLC,¹² MIAX Pearl Options Exchange,¹³ and others. In general, the relative value of these products depends on the volume of transactions included; the greater the volume of transactions, the greater the value of the data. The current purchasers of Trade Profile are investment banks, market makers, asset managers and other buy-side investors.

Proposed Changes

Fee Changes for End of Day and Intraday Products

The Exchange proposes to increase the fee for the End of Day product from \$750 to \$850, and the Intraday Product from \$2,000 to \$2,500. The discounted rate of \$2,500 per month for both end of day and intraday information will be increased to \$3,100 to reflect the new fees while preserving the \$250 discount.

Discount for Historical Data

The Exchange proposes to alter discounts for historical end of day and intraday data for current Distributors.¹⁴ Specifically, the Exchange proposes to offer the most recent 36 months of end of day data for \$7,200, and the most recent 36 months intraday data for \$12,000.

¹¹ See, e.g., Securities Exchange Act Release No. 93132 (September 27, 2021), 86 FR 54499 (October 1, 2021) (SR-NYSEArca-2021-82) (describing the NYSE Options Open-Close Volume Summary as a volume summary of trading activity on the exchange at the option level by origin, side of the market, contract volume and transaction type).

¹² See, e.g., Securities Exchange Act Release No. 97174 (March 21, 2023), 88 FR 18201 (March 27, 2023) (SR-BOX-2023-09) (describing the BOX exchange Open-Close Data report as providing volume by origin, buying/selling, and opening/closing criteria).

¹³ See, e.g., Securities Exchange Act Release No. 91964 (May 21, 2021), 86 FR 28667 (May 27, 2021) (SR-PEARL-2021-24) (introducing the Open-Close Report).

¹⁴ A “Distributor” is any firm that receives Trade Profile information and then distributes it internally

Ad-hoc requests for historical end of day data are currently \$600 per request per month. A complete set of historical end of day data is \$27,500 per request. For intraday data, there is a sliding scale of charges: \$1,000 per request per month; \$2,000 per request per quarter; and \$8,000 per request per year.

The proposed rates are a substantial discount from current fees. With respect to end of day data, ad hoc requests are \$600 per request per month. Three years of such data would cost \$21,600. The proposed rate of \$7,200 is far below this level. With respect to intraday information, the current rates are \$1,000 per request per month, \$2,000 per request per quarter, and \$8,000 per request per year. Using the lowest rate of \$8,000 per request per year, the most recent 36 months of intraday information would cost \$24,000. The proposed rate of \$12,000 for the most recent 36 months of intraday data is a substantial discount from the current rate.

For customers that request more than three years of information, end of day historical information can still be purchased for \$600 per request per month, and intraday information can be purchased at \$1,000 per request per month. The discount for a complete set of historical end of day data is \$27,500 per request is being removed because the Exchange has found that the most recent three years of data is sufficient for most customer needs. Many customers use historical data to test their strategies and models, and our discussions with current and former customers and experience indicate that 36 months of data is sufficient for most customer needs, and is an effective baseline for review.

The historical data will continue to provide the same categories of information available for current subscribers under the new proposal.

Eligibility for the discount will depend on the type of current subscription. A current purchaser of End of Day data would be eligible for the historical End of Day product at the reduced rate. A current purchaser of the Intraday product would similarly be able to purchase the historical Intraday product at the reduced rate. A purchaser of both the current End of Day and Intraday products would be entitled to purchase both types of history at the reduced rate.

The 36-month period will be based on the date of purchase of the 36 months of data by a current distributor. For example, a customer that buys the End of Day product for the first time in July 2024 would also be able to purchase historical End of Day data for the period July 2021 through July 2024 (inclusive) at the discounted rate. Similarly, a customer with an existing End of Day subscription in July 2024 would be able to purchase the historical End of Day data from July 2021 through July 2024 at the discounted rate. The same reasoning would apply to Intraday customers.¹⁵

The fees for historical data are linked to the current product because effective historical testing requires a comparison of similar licenses. Effective testing of the End of Day product, for example, requires End of Day historical data, and the same would hold true for Intraday data.

The Exchange proposes to remove the fee of \$2,000 per request per quarter and \$8,000 per request per year as no longer useful in light of the much lower discount being proposed for 36 months of historical data.

¹⁵ A customer may use the proposed historical data discount more than once. For example, a Current Distributor that purchases 36 months of historical data at a discount, but later terminates that subscription, would be eligible to purchase another 36 months of historical data (based on the date of purchase) upon renewing that subscription. (Current Distributors that never terminate would have no need for a second purchase, as they would already possess the most recent months of historical data.).

Historical data is useful in analyzing option trade and volume data, evaluating historical trends in the trading activity of a particular option series, and creating and testing trading models and analytical strategies, and is often purchased concurrently with a new subscription to ISE Open/Close Trade Profile. Many customers use historical data to test their strategies and models, and our discussions with current and past customers and experience indicate that 36 months of data is sufficient for most customer needs, and is an effective baseline for review.

External Distribution of Derived Data

The Exchange proposes to offer a license for the unlimited external distribution of Derived Data from ISE Trade Profile for \$4,500 per month. Derived Data is “any information generated in whole or in part from Exchange Information¹⁶ such that the information generated cannot be reverse engineered to recreate Exchange Information, or be used to create other data that is recognizable as a reasonable substitute for such Exchange Information.”

Fees for external distribution of Derived Data from ISE Trade Profile are in addition to fees for the End of Day product or the Intraday product, or both, as applicable.

This is a new license to be offered by the Exchange; external distribution of Derived Data is not currently permitted. The proposal, based on a similar license offered

¹⁶ “Exchange Information” is any data or information that has been collected, validated, processed and/or recorded by the Exchange and made available for transmission relating to: (i) Eligible securities or other financial instruments, markets, products, vehicles, indicators, or devices; (ii) activities of the Exchange; or (iii) other information or data from the Exchange. Information includes, but is not limited to, any element of information used or processed in such a way that Exchange Information or a substitute for such Information can be identified, recalculated or re-engineered from the processed information.

by the Phlx Exchange,¹⁷ will allow the external distribution of analytic products derived from ISE Trade Profile to the general investing public. A similar product is also being proposed for the Nasdaq Options Market and the GEMX Exchange.

Experience with the Phlx Exchange indicates that this license provides an effective mechanism for market data vendors to identify, develop, and sell derived market data products, such as sentiment indicators, harnessing the power of the competitive marketplace to promote innovation. The Exchange expects that this product will have the greatest utility for the general investing public.

2. Statutory Basis

XXXXXXXXXXXXXXXX

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁸ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁹ in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Equitable Allocation of Reasonable Dues, Fees and Other Charges

The proposed changes are an equitable allocation of reasonable dues, fees and other charges because: (i) the trade profile products offered by multiple exchanges are substitutes, and customers are free to choose which product they purchase; and (ii) the

¹⁷ See Securities Exchange Act Release No. 93293 (October 12, 2021), 86 FR 57716 (October 18, 2021) (SR-Phlx-2021-58).

¹⁸ 15 U.S.C. 78f(b).

¹⁹ 15 U.S.C. 78f(b)(4) and (5).

proposed fees are comparable to the fees charged by other exchanges, and customers are free to purchase other products if the Exchange has mistaken the value of its product.

Substitution

As noted above, products similar to Trade Profile have been available on multiple exchanges for many years and are well-established in the market. Such products are available from Phlx,²⁰ ISE,²¹ GEMX,²² Cboe,²³ NYSE American,²⁴ NYSE Arca,²⁵ BOX,²⁶ MIAX Pearl,²⁷ and others.

Trade outline products offer the same categories of data through end of day or intraday reports. The information provided by one exchange is generally similar to that provided by other exchanges because order flow can move from one exchange to another, and market sentiment trends that appear on one exchange are likely to be similar to the

²⁵ See, e.g., Securities Exchange Act Release No. 93132 (September 27, 2021), 86 FR 54499 (October 1, 2021) (SR-NYSEArca-2021-82) (describing the NYSE Options Open-Close Volume Summary as a volume summary of trading activity on the exchange at the option level by origin, side of the market, contract volume and transaction type).

²⁶ See, e.g., Securities Exchange Act Release No. 97174 (March 21, 2023), 88 FR 18201 (March 27, 2023) (SR-BOX-2023-09) (describing the BOX exchange Open-Close Data report as providing volume by origin, buying/selling, and opening/closing criteria).

²⁷ See, e.g., Securities Exchange Act Release No. 91964 (May 21, 2021), 86 FR 28667 (May 27, 2021) (SR-PEARL-2021-24) (introducing the Open-Close Report).

sentiment trends on other exchanges. The key differentiator in the quality of the data depends on the volume of transactions on a given exchange; the greater the volume of transactions, the greater the value of the data. Customers can choose not to purchase the trade outline product of one exchange and substitute it for that of another exchange.

Customers can also choose not to purchase a trade outline product at all. Trade outline products are designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade. Customers can, and do, choose to forego the information from Trade Profile or any of its competitor products when making a trade.

Nasdaq and its affiliates have observed that customers purchase sufficient data to provide a view of the market, but not more, as the value of data from each additional exchange yields diminishing returns. As a result, all exchanges are limited in what they will be able to charge for a trade outline product.

As the Commission and courts²⁸ have recognized, “[i]f competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.”²⁹ Accordingly, “the existence of significant

²⁸ The decision of the United States Court of Appeals for the District of Columbia Circuit in NetCoalition v. SEC, 615 F.3d 525 (D.C. Cir. 2010) upheld the Commission’s reliance upon competitive markets to set reasonable and equitably allocated fees for market data. “In fact, the legislative history indicates that the Congress intended that the market system evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed and that the SEC wield its regulatory power in those situations where competition may not be sufficient, such as in the creation of a consolidated transactional reporting system.” NetCoalition I at 535 (quoting H.R. Rep. No. 94-229, at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 321, 323) (internal quotation marks omitted). The court agreed with the Commission’s conclusion that “Congress intended that competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.” Id. (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74771 (December 9, 2008) (SR-NYSEArca-2006-21)).

²⁹ See Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770 (December 9, 2008) (SR-NYSEArca-2006-21).

competition provides a substantial basis for finding that the terms of an exchange’s fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.”³⁰ The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues, and also recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”³¹ Trade Profile is in direct competition with multiple exchanges that offer similar products in end of day and intraday formats.³²

The license to allow the external distribution of Derived Data, like the purchase of the end of day and intraday licenses, is also subject to competition. Any exchange that wishes to allow distribution of a Derived Data product based on options trading information would be able to do so with an immediately effective fee filing similar to this proposal.

Moreover, as explained above, the proposal is designed to promote the dissemination of a variety of analytical insights—generally used only by investment banks, market makers, asset managers and other buy-side investors—to the general

³⁰ See id.

³¹ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (“Regulation NMS Adopting Release”).

³² These substitute products include: NOTO, ISE Trade Profile, GEMX Trade Profile data; open-close data from Cboe C1, C2, BZX, and EDGX; and Open Close Reports from MIAX Options, Pearl, and Emerald.

investing public by creating an incentive for market data vendors to identify, develop, and sell such indicators. As such, the proposal will spur competition among not only exchanges, but vendors as well.

The discounted fees for historical data and the \$250 discount for the purchase of both end of day and intraday data together, like the purchase of the end of day, intraday and Derived Data licenses, is also subject to competition. Any exchange that wishes to provide discounts for historical data or the joint usage of end of day and intraday information would be able to do so with an immediately effective fee filing in response.

Comparability of Proposed Fees

The proposed fees are comparable to the fees charged by similarly-situated exchanges.

As explained above, the value of Trade Profile is determined in part by the number of underlying transactions reflected in the data.

ISE has a market share comparable to NYSE American, MIAX, and MIAX Pearl at approximately 6% to 7% in the second quarter of 2024.³³ For intraday products, NYSE American charges \$2,000,³⁴ MIAX charges \$2,000,³⁵ and MIAX Pearl charges \$2,000.³⁶ The proposed fees of \$2,500 for ISE are above this because ISE believes that

³³ See NasdaqTrader.com, “Options Market Statistics,” available at <https://www.nasdaqtrader.com/Trader.aspx?id=OptionsVolumeSummary>.

³⁴ See NYSE American, “NYSE American Options Proprietary Market Data Fees as of November 1, 2023,” available at https://www.nyse.com/publicdocs/nyse/data/NYSE_American_Options_Market_Data_Fee_Schedule.pdf

³⁵ See MIAX Options Exchange, “Fee Schedule as of April 23, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_04232024.pdf

³⁶ See MIAX Pearl Options Exchange, “Fee Schedule as of April 15, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Options_Fee_Schedule_04152024.pdf

the other exchanges are not accurately reflecting the value of the data. CBOE C1, at a slightly larger market share of approximately 9%,³⁷ charges \$3,000 for intraday data,³⁸ and we believe the proposed fee of \$2,500 is more in line with the overall market for trade outline information than the \$2,000 charged by other exchanges.

For end of day data, NYSE American charges \$750,³⁹ MIAX charges \$600,⁴⁰ and MIAX Pearl charges \$600.⁴¹ The proposed fees of \$850 are higher than this range, but the Exchange believes that its competitors are underestimating the value of the product.

Nasdaq is not aware of another exchange that provides a similar discount for historical data other than its own affiliates.

If the Exchange is wrong in either of these assessments, it will lose sales as a result.

The Proposal Does Not Permit Unfair Discrimination

Nothing in the proposal treats any category of market participant any differently from any other category of market participant. On the contrary, the proposal expands distribution of Trade Profile beyond investment banks, market makers, asset managers and other buy-side investors to market data vendors and the general investing public.

³⁷ See NasdaqTrader.com, “Options Market Statistics,” available at <https://www.nasdaqtrader.com/Trader.aspx?id=OptionsVolumeSummary>.

³⁹ See NYSE American, “NYSE American Options Proprietary Market Data Fees as of November 1, 2023,” available at https://www.nyse.com/publicdocs/nyse/data/NYSE_American_Options_Market_Data_Fee_Schedule.pdf.

⁴⁰ See MIAX Options Exchange, “Fee Schedule as of April 23, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_04232024.pdf

⁴¹ See MIAX Pearl Options Exchange, “Fee Schedule as of April 15, 2024,” available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Options_Fee_Schedule_04152024.pdf

Allowing the distribution of Derived Data to the general investing public will broaden the availability of such information while not treating any current recipient of the product differently in any way. The new fee structure, which modifies fees to reflect current market value and offers historical data at a discount, applies equally to all current and potential distributors. Trade Profile is available to all market participants, including members and non-members, and all market participants receive the same information in the Trade Profile data feed.

With respect to the specific fee changes, it is reasonable and not unfair discrimination to charge an external distributor of Derived Data a \$4,500 licensing fee. Vendors will ordinarily charge a fee to their downstream customers for this service, and, even if the vendor is not charging a specific fee for this particular service, Derived Data products from the Exchange will be part of a suite of offerings that generally promote sales. External distribution is fundamentally different than internal use, in that the former generates revenue from external sales while the latter does not. It is not unfair discrimination to charge a licensing fee for a product that generates downstream revenue.

Nor is it unfair discrimination to allow the redistribution of Derived Data, but not the underlying information, to the general investing public. As explained above, neither exchanges nor vendors ordinarily allow redistribution of analytic products—such products are typically designed solely for the use of direct customers, not for redistribution to the customers of customers in the manner of a data feed. Allowing the redistribution of Derived Data provides an incentive for vendors to innovate with new compelling and varied analytic products for the general investing public that will provide access to market sentiment insights currently available only to sophisticated investors.

This proposal is therefore not unfair discrimination, but rather allows for more equitable access to market sentiment information to the general investing public.

It is also not unfair discrimination to provide a discount for 36 months of historical data to current distributors, but not former distributors or firms that have never purchased the product. Any firm would be able to become a current distributor at any time by subscribing to Trade Profile, and would be able to cancel the subscription at any time after receiving the 36 months of historical data for the proposed discounted fee. It is not unfair discrimination to limit the historical data discount to current distributors. Historical information is generally used by current users to test their strategies and trading models, and they are therefore in the best position to benefit from the historical data. Firms that do not currently receive the service would have less use for the information, although, to the extent that they find such information useful, they would still be able to purchase the information on an ad hoc basis without a current subscription.

For all of these reasons, the proposal does not permit unfair discrimination.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of intermarket competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees

in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

Intermarket Competition

Nothing in the proposal burdens inter-market competition (the competition among self-regulatory organizations).

As discussed above, Trade Profile is subject to direct competition from other options exchanges that offer substitutes. Any of these exchanges can replicate this proposal in full or in part, and nothing in the proposal would interfere with the ability of any exchange to do so.

Intra-market Competition

Nothing in the proposal burdens intra-market competition (the competition among consumers of exchange data). Trade Profile is available to any customer under the same fee schedule as any other customer, and any market participant that wishes to purchase these products can do so on a non-discriminatory basis. Indeed, the proposal will foster competition by expanding dissemination of data to vendors and the general investing public, and by encouraging more market participants to use Trade Profile data to help inform their investments strategies and analytic models.

Offering the 36 months of historical data to current distributors, but not former distributors or firms that have never purchased the product, will not burden competition because non-subscribers are free to purchase a current subscription or purchase historical data on an ad hoc basis.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.⁴² At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-ISE-2024-32 on the subject line.

⁴² 15 U.S.C. 78s(b)(3)(A)(ii).

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-ISE-2024-32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-ISE-2024-32 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴³

Sherry R. Haywood,

Assistant Secretary.

⁴³ 17 CFR 200.30-3(a)(12).

EXHIBIT 5

NASDAQ ISE, LLC RULES**Options Rules****Options 7: Pricing Schedule**

* * * * *

Section 10. Market Data**A. Nasdaq ISE Open/Close Trade Profile End of Day**

Subscription - \$850[\$750] per month with an annual subscription.

Ad-hoc Request (historical data) - \$600 per request per month. An ad-hoc request can be for any number of months beginning with January 2006[May 2005] for which the data is available.

[Complete Set (historical data) - \$27,500 per request. A complete set includes all the months from May 2005 through the current month.]

Academic Ad-hoc request (historical data) - \$500 per request. An ad-hoc request for up to 12 months of data. Academic institutions may use this data for academic purposes only and not for actual securities trading.

Academic Complete Set (historical data) - \$1,000 per request. A complete set includes all the months from January 2006[May 2005] through the current month. Academic institutions may use this data for academic purposes only and not for actual securities trading.

Free trial-A one month free trial is available to both members and non-members who have not previously subscribed to the Nasdaq ISE Open/Close Trade Profile End of Day.

B. Nasdaq ISE Open/Close Trade Profile Intraday

Subscription - \$2,500[\$2,000] per month.

Ad-hoc Request (historical data). An ad-hoc request can be for any number of months, quarters or years beginning with October 2009 for which the data is available.

\$1,000 per request per month.

[\$2,000 per request per quarter.]

[\$8,000 per request per year.]

Academic Ad-hoc request (historical data) - \$1,000* per ad-hoc request for up to 12 months of data. Academic institutions may use this data for academic purposes only and not for actual securities trading.

Academic Complete Set (historical data) - \$2,000* per request for a complete set that includes all the months from October 2009 through the current month. Academic institutions may use this data for academic purposes only and not for actual securities trading.

*Credits will apply for previous purchases of Nasdaq ISE Open/Close data for the academic author and/or university that provide a link to published research papers on the use of Nasdaq ISE Open/Close data that can be posted on the Nasdaq ISE website. For example, a university that previously purchased the Nasdaq ISE Open/Close Trade Profile for \$1,000 would pay an incremental \$1,000 for all of the history for the Open/Close Trade Profile Intraday data.

C. Nasdaq ISE Trade Profile Historical Data and External Distribution of Derived Data

<u>Account Type</u>	<u>Fee</u>
<u>Historical Data for Current End of Day Product Distributors:</u>	<u>\$7,200 for the most recent 36 months</u>
<u>Historical Data for Current Intraday Product Distributors:</u>	<u>\$12,000 for the most recent 36 months</u>

The most recent 36 months is measured based on the date of purchase of the 36 months of data a Current Distributor.

A “Distributor” is any firm that receives Trade Profile information and then distributes it internally.

A “Current Distributor” is any firm that purchases either the End of Day Product for the current month, or the Intraday Product for the current month in the same month that the 36 months of historical End of Day or Intraday data is ordered.

<u>Unlimited External Distribution of Derived Data from ISE Trade Outline:</u>	<u>\$4,500 per month</u>
--	--------------------------

Fees for external distribution of Derived Data from ISE Trade Outline are in addition to fees for the End of Day product or the Intraday product, or both, as applicable.

“Derived Data” is any information generated in whole or in part from Exchange Information such that the information generated cannot be reverse engineered to recreate

Exchange Information, or be used to create other data that is recognizable as a reasonable substitute for such Exchange Information.

“Exchange Information” is any data or information that has been collected, validated, processed and/or recorded by the Exchange and made available for transmission relating to: (i) eligible securities or other financial instruments, markets, products, vehicles, indicators or devices; (ii) activities of the Exchange; or (iii) other information or data from the Exchange. Information includes, but is not limited to, any element of information used or processed in such a way that Exchange Information or a substitute for such Information can be identified, recalculated or re-engineered from the processed information.

D[C]. Nasdaq ISE Open/Close Trade Profile End of Day and Nasdaq ISE Open/Close Trade Profile Intraday

Subscription - \$3,100[2,500] per month with an annual subscription.

E[D]. Enhanced Sentiment Market Data

Nasdaq ISEE Select Data Feed

Firms will be charged \$0.10 per end user for redistribution to up to 10,000 end users on a monthly basis.

Firms will be charged \$0.10 per end user for redistribution to 10,001 to 74,999 end users on a monthly basis.

Firms will be charged \$0.084 per end user for redistribution to 75,000 to 199,999 end users (minimum increment of 5,000 end users).

Firms will be charged \$0.0825 per end user for redistribution to 200,000 or more end users (minimum increment of 5,000 end users).
