SR-ISE-2025-26 Exhibit 4 A-3.docx

The full text shall be marked, in any convenient manner, to indicate additions to and deletions from the immediately preceding filing. The purpose of Exhibit 4 is to permit the staff to identify immediately the changes made from the text of the rule with which it has been working.

Exhibit 5 - Proposed Rule Text

Add Remove View

SR-ISE-2025-26 Exhibit 5 A-3.docx

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

Partial Amendment

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Nasdaq ISE, LLC (“ISE” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposed rule to amend Options 9, Sections 13 and 15 to increase the position and exercise limits for options on iShares Bitcoin Trust ETF (“IBIT”). This Amendment No. 3 replaces and supersedes the original filing as modified by Amendment No. 1 in its entirety and proposes to:

- remove any references to FLEX Options as this rule change, as amended, solely proposes to amend the position and exercise limits for options on IBIT;
- make clear that, as proposed, the new position and exercise limits would not be subject to the six-month review noted in Options 9, Section 13(e);
- correct a percentage related to the exercisable risk of the shares outstanding of IBIT; and
- amend language in connection with the approval of the Penny Program.

A notice of the proposed rule change for publication in the Federal Register is attached hereto as Exhibit 1.

The text of the proposed rule change is attached as Exhibit 5.

(b) Not applicable.

(c) The proposed rule change amends Nasdaq GEMX, LLC (“GEMX”) and Nasdaq MRX, LLC (“MRX”) Options 9, Sections 13 and 15. GEMX and MRX incorporate ISE Options 9, Sections 13 and 15 by reference.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”). Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to:

3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to increase the position and exercise limits for options on IBIT.

IBIT is an Exchange-Traded Fund (“ETF”) that holds Bitcoin and is listed on The Nasdaq Stock Market LLC.³ On September 20, 2024, ISE received approval to list options on IBIT.⁴ The position and exercise limits for IBIT options are currently set as stated in Options 9, Sections 13 and 15.⁵

³ Nasdaq received approval to list and trade Bitcoin-Based Commodity-Based Trust Shares in IBIT pursuant to Rule 5711(d) of Nasdaq. See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (January 17, 2024) (SR-NASDAQ-2023-016) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units). IBIT started trading on January 11, 2024.

⁴ See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, To Permit the Listing and Trading of Options on the iShares Bitcoin Trust) (“IBIT Approval Order”). ISE began trading IBIT options on November 19, 2024.

⁵ IBIT currently has a position limit of 250,000 contracts.

Position limits, and exercise limits, are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. These limits, which are described in ISE Options 9, Sections 13 and 15, are intended to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Position and exercise limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that could be used for legitimate economic purposes.

To achieve this balance, ISE proposes to increase the position limits and exercise limits for options on IBIT to 1,000,000 contracts by noting the proposed position limit in Supplementary Material .01 to Options 9, Section 13 and noting the proposed exercise limits in Supplementary Material .01 to Options 9, Section 15. The position limit for options on IBIT is currently set pursuant to ISE Options 9, Section 13(d) where the largest in capitalization and the most frequently traded stocks and ETFs have an option position limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization stocks and ETFs have position limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, recapitalizations, etc.) on the same side of the market. The Exchange notes that the proposed position limits and exercise limits for options on IBIT are consistent with existing position limits and exercise limits for options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF.

Composition and Growth Analysis for Underlying ETFs

As stated above, position (and exercise) limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate the underlying

market so as to benefit options positions. The Commission has recognized that these limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market, as well as serve to reduce the possibility for disruption of the options market itself, especially in illiquid classes.⁶

Per the Commission, “rules regarding position and exercise limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options positions.”⁷ For this reason, the Commission requires that “position and exercise limits must be sufficient to prevent investors from disrupting the market for the underlying security by acquiring and exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security.”⁸ The Exchange has observed an ongoing increase in demand in options on IBIT in 2025.⁹ The Exchange believes the current position limit and exercise limit of 250,000 contracts (the highest position limit available pursuant to Options 9, Section 13 and exercise limit pursuant to Options 9, Section 15) will impede trading activity and strategies of investors, such as use of effective hedging vehicles or income generating strategies (e.g., buy-write or put-write), and the ability of Market Makers to make liquid markets with tighter spreads in IBIT options.

⁶ See Securities Exchange Act Release No. 67672 (August 15, 2012), 77 FR 50750 (August 22, 2012) (SR-NYSEAmex-2012-29).

⁷ See supra note 4, IBIT Approval Order, 89 FR 78946.

⁸ See id.

⁹ In 2024, the Exchange filed a rule proposal, which was later approved in 2025, to eliminate the 25,000 contract position and exercise limits for IBIT options and apply the position and exercise limits in ISE Options 9, Sections 13 and 15 to IBIT options utilizing November 25, 2024 data. See Securities Exchange Act Release No. 103564 (July 29, 2025), 90 FR 36229 (August 1, 2025) (SR-ISE-2024-62) (Order Approving a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, Regarding Position and Exercise Limits for Options on the iShares Bitcoin Trust ETF) (“SR-ISE-2024-62”).

The Exchange believes that increasing the position limit (and exercise limit) for options on IBIT to 1,000,000 contracts would enable liquidity providers to provide additional liquidity to the Exchange, as well as other options exchange on which they participate. As described in further detail below, the Exchange believes that the continuously increasing market capitalization of IBIT options, as well as the highly liquid markets for those securities, reduces the concerns for potential market manipulation and/or disruption in the underlying markets upon increasing position limits, while the rising demand for trading options on IBIT for legitimate economic purposes compels an increase in position limits (and corresponding exercise limits).

IBIT currently qualifies for a 250,000 contract position limit pursuant to the criteria in Options 9, Section 13(d), which requires that, for the most recent six-month period, trading volume for the underlying security be at least 100 million shares.¹⁰ As of September 22, 2025, the market capitalization for IBIT was 86,243,795,200¹¹ with an average daily volume (“ADV”), for the preceding 6 months prior to September 22, 2025 of 44,590,758 shares. By comparison on the same day, the iShares MSCI Emerging Markets (“EEM”) has an ADV of 25,951,152 shares and an AUM of 15,253,164 the iShares China Large-Cap ETF (“FXI”) has an ADV 37,112,065 and an AUM of 6,641,144,520, and the iShares MSCI EAFE ETF (“EFA”) has an ADV of 15,253,164 shares and an AUM of 65,309,708,400.¹²

¹⁰ Options 9, Section 13(d), Equity Option Position Limits, provides at subparagraph (5) that to be eligible for the 250,000 contract limit, either the most recent six (6) month trading volume of the underlying security must have totalled at least 100 million shares or the most recent six-month trading volume of the underlying security must have totalled at least seventy-five (75) million shares and the underlying security must have at least 300 million shares currently outstanding.

¹¹ The market capitalization was determined by multiplying a Net Asset Value of \$63.82 by the number of shares outstanding 1,351,360,000. This figure was acquired as of September 22, 2025. See <https://www.ishares.com/us/products/333011/ishares-Bitcoin-trust-etf>.

¹² These figures are from September 22, 2025.

In addition to IBIT's Options 9, Section 13(d) eligibility for 1,000,000 contracts, the Exchange performed additional analysis with respect to IBIT. First, ISE considered IBIT's market capitalization and ADV, and prospective position limit in relation to other securities. In measuring IBIT against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations ("OCC").¹³ This pool of data took into consideration 3,837 options on single stock securities, excluding broad based ETFs.¹⁴ Next, the data was aggregated based on market capitalization and ADV and grouped by option symbol and position limit utilizing statistical thresholds for ADV, based on 180 days, and market capitalization that were one standard deviation¹⁵ above the mean for each position limit category (i.e. 25,000, 50,000 to 52,000, 75,000, 200,000, 250,000 to 375,000, 450,000 to 650,000, 750,000 to 1,250,000 and, and greater than or equal to 2,000,000).¹⁶ This exercise was performed to demonstrate IBIT's position limit relative to other options symbols in terms of market capitalization and ADV. For reference, the market capitalization for IBIT was \$86,243,795,200¹⁷ with an ADV, for the preceding 180 days prior to September 22, 2025 of 44,590,758 shares.

¹³ The computations are based on OCC data from September 22, 2025. Data displaying zero values in market capitalization or ADV were removed.

¹⁴ IBIT has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

¹⁵ The standard deviation added limited utility to the analysis given the heavily skewed distribution of market capitalizations in the single stock securities.

¹⁶ These buckets are based on OCC's current positions limits. See <https://www.theocc.com/market-data/market-data-reports/series-and-trading-data/position-limits>. ISE Options 9, Section 13(d) sets out position limits for various contracts. For example, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. The Exchange notes that position limits may also be higher due to corporate actions in the underlying equities, such as a stock split.

¹⁷ Net Asset Value of \$63.82 by the number of shares outstanding 1,351,360,000 This figure was acquired as of September 22, 2025. See <https://www.ishares.com/us/products/333011/ishares-Bitcoin-trust-etf>.

Standard deviation	3,801,401,188	6,060,205,416	10,906,688,857	11,243,106,431	155,720,555,229	61,397,662,386	252,788,200,396	1,540,543,863,123
IBIT rank	1	1	3	3	127	4	6	5
IBIT % rank	99.78%	99.76%	99.52%	98.77%	93.82%	87.10%	45.45%	37.50%

Based on the above table, if IBIT were compared to the 10 stocks that have position limits of 750,000 contracts to 1.25 million contracts it would rank in the 45th percentile for market capitalization and the 91st percentile for ADV.

The Exchange also analyzed the position limits for IBIT by regressing the median elements from each bucket of market capitalization and 180-day ADV of all non-ETF equities, against their respective position limit figures. From this regression, the Exchange was able to determine the implied coefficients to create a formulaic method for determining an appropriate

position limit.¹⁸ The Exchange utilized a linear model approach which incorporated the median metric from each bucket given the data at both the lower end of each position limit bucket and the higher end of each position limit bucket could be considered significant outliers, thereby skewing the results. Below are various linear models utilizing market capitalization and ADV as well as a two factor model to determine the appropriate coefficients when both metrics are incorporated into the same model.¹⁹

Figure 1

Figure 1 utilizes IBIT's market capitalization of 86,243,795,200 to arrive at a modeled position limit of 1,749,876.

¹⁸ The Exchange utilized Excel's Data Analysis Package to model the position limit.

¹⁹ See id.

Figure 2

Figure 2 utilizes IBIT's ADV of 44,590,758 to arrive at a modeled position limit of 4,675,816.

Based on the aforementioned analysis, the Exchange believes that the proposed 1,000,000 contracts position and exercise limit is appropriate.

Figure 3

Two Factor Model

Figure 3 shows the results when constructing a two-factor model employing both metrics (180-day ADV and market capitalization). The result is a modeled position limit of 3,871,575.²⁰

Second, ISE reviewed IBIT's data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables. Also, as of September 22, 2025, there were approximately 19,923,945 Bitcoins in circulation.²¹ At a price of \$112,748,²² that equates to a market capitalization of greater than \$2.246 trillion US. If a position limit of 1,000,000 contracts were considered, the exercisable risk would represent 7.39995%²³ of the outstanding shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer, the position limit can be compared to the total market capitalization of the entire Bitcoin market and in that case, the exercisable risk for options

²⁰ See id.

²¹ See <https://www.coingecko.com/en/coins/Bitcoin>.

²² This is the approximate price of Bitcoin from September 22, 2025.

²³ This percentage is arrived at with this equation: (1,000,000 contract limit * 100 share per option / 1,351,360,000 shares outstanding).

on IBIT would represent 0.284% of all Bitcoin outstanding.²⁴ Assuming a scenario where all options on IBIT shares were exercised given the proposed 1,000,000-contract position limit (and exercise limit), this would have a virtually unnoticed impact on the entire Bitcoin market. This analysis demonstrates that the proposed 1,000,000 per same side position and exercise limit is appropriate for options on IBIT given its liquidity.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked to the CME bitcoin futures contract²⁵ that has a position limit of 2,000 futures.²⁶ On September 5, 2025, CME bitcoin futures settled at \$94,945.²⁷ On September 22, 2025, IBIT settled at \$54.02, which would equate to greater than 17,557,898 shares of IBIT if the CME notional position limit was utilized. Since substantial portions of any distributed options portfolio is likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for bitcoin futures (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 175,578 limit. Of note, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according

²⁴ This number was arrived at with this calculation: $(1,000,000 \text{ limit} * 100 \text{ shares per option} * \$63.82 \text{ IBIT NAV}) / (19,923,945 \text{ BTC outstanding} * \$112,748 \text{ BTC price})$.

²⁵ CME Bitcoin Futures are described in Chapter 350 of CME’s Rulebook.

²⁶ See the Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5 of CME’s Rulebook.

²⁷ 2,000 futures at a 5 bitcoin multiplier (per the contract specifications) equates to \$949,450,000 $(2,000 \text{ contracts} * 5 \text{ BTC per contract} * \$94,945 \text{ price of November BTC future})$ of notional value.

to an aggregation ratio(s).²⁸ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.²⁹ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading, but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Based on the aforementioned analysis, the Exchange believes that the proposed 1,000,000 contracts position and exercise limit is appropriate.

Fourth, ISE analyzed a position limit and exercise limit of 1,000,000 for IBIT options against other options on ETFs with an underlying commodity, namely SPDR Gold Shares ("GLD"), iShares Silver Trust ("SLV"), and ProShares Bitcoin ETF ("BITO").³⁰ GLD has a float of 342 million shares³¹ and a position limit of 250,000 contract. SLV has a float of 536 million shares,³² and a position limit of 250,000 contracts. Finally, BITO has 142.79 million shares outstanding³³ and a position limit of 250,000 contracts. As previously noted, position limits and exercise limits are designed to limit the number of options contracts traded on the

²⁸ See <https://www.cmegroup.com/education/courses/market-regulation/position-limits/position-limits-aggregation-of-contracts-and-table.htm>.

²⁹ Id.

³⁰ GLD, SLV and BITO each hold one asset in trust similar to IBIT.

³¹ See <https://www.ssga.com/us/en/intermediary/etfs/spdr-gold-shares-gld>.

³² See <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

³³ See <https://www.marketwatch.com/investing/fund/bit0>.

exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. A position limit exercise in GLD would represent 7.31% of the float of GLD; a position limit exercise in SLV would represent 4.66% of the float of SLV, and a position limit exercise of BITO would represent 17.51% of the float of BITO. In comparison, a 1,000,000-contract position limit in IBIT options would represent 7.39995%³⁴ of the float of IBIT. Consequently, the 1,000,000 proposed IBIT options position and exercise limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate.

Fifth, ISE notes that IBIT began trading in penny increments as of January 2, 2025 pursuant to the Penny Interval Program.³⁵ The Commission noted that evidence and analysis provided in connection with the Penny Pilot demonstrated that the Pilot benefitted investors and other market participants in the form of narrower spreads.³⁶ The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program

³⁴ This percentage is arrived at with this equation: (1,000,000 contract limit * 100 share per option / 1,351,360,000 shares outstanding). This information was captured on September 22, 2025.

³⁵ The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Supplementary Material .01(b) to Options 3, Section 3. The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Supplementary Material .01(b) to Options 3, Section 3. See Supplementary Material .01 to ISE Options 3, Section 3.

³⁶ See Securities Exchange Act Release No. 88532 (April 1, 2020), 85 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) (“Penny Approval Order”).

reflects a certain level of trading interest (either because the class is newly listed or a class experienced a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.³⁷ IBIT options is among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments. Failing to increase position and exercise limits for IBIT options, now that it is trading in finer increments, may artificially inhibit liquidity and create price inefficiency. The Exchange notes that options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF also trade in penny increments based on their liquidity.

The Exchange believes that IBIT options have more than sufficient liquidity to garner an increased position and exercise limit of 1,000,000 contracts. The Exchange believes that any concerns related to manipulation and protection of investors are mollified by the significant liquidity provision in IBIT. The Exchange states that, as a general principle, increases in active trading volume and deep liquidity of the underlying securities do not lead to manipulation and/or disruption.

The Exchange believes that increasing the position (and exercise) limits for IBIT options would lead to a more liquid and competitive market environment for IBIT options, which will benefit customers that trade these options. Further, the reporting requirement for such options would remain unchanged. Thus, the Exchange will still require that each Member that maintains positions in impacted options on the same side of the market, for its own account or for the account of a customer, report certain information to the Exchange. This information includes, but would not be limited to, the options' positions, whether such positions are hedged and, if so,

³⁷ Id. at 19548.

a description of the hedge(s). Market Makers would continue to be exempt from this reporting requirement, however, the Exchange may access Market Maker position information.³⁸

Moreover, the Exchange's requirement that Members file reports with the Exchange for any customer who held aggregate large long or short positions on the same side of the market of 200 or more option contracts of any single class for the previous day will remain at this level and will continue to serve as an important part of the Exchange's surveillance efforts.³⁹

The Exchange also has no reason to believe that the growth in trading volume in IBIT will not continue. Rather, the Exchange expects continued options volume growth in IBIT as opportunities for investors to participate in the options markets increase and evolve. The Exchange believes that the current position and exercise limits in IBIT options are restrictive and will hamper the listed options markets from being able to compete fairly and effectively with the over-the-counter ("OTC") markets. OTC transactions occur through bilateral agreements, the terms of which are not publicly disclosed to the marketplace. As such, OTC transactions do not contribute to the price discovery process on a public exchange or other lit markets. The Exchange believes that without the proposed changes to position and exercise limits for IBIT options, market participants will find the 250,000-contract position limit an impediment to their business and investment objectives as well as an impediment to efficient pricing. As such, market participants may find the less transparent OTC markets a more attractive alternative to achieve their investment and hedging objectives, leading to a retreat from the listed options markets, where trades are subject to reporting requirements and daily surveillance.

³⁸ OCC through the Large Option Position Reporting ("LOPR") system acts as a centralized service provider for Member compliance with position reporting requirements by collecting data from each Member, consolidating the information, and ultimately providing detailed listings of each Member's report to the Exchange, as well as Financial Industry Regulatory Authority, Inc. ("FINRA"), acting as its agent pursuant to a regulatory services agreement ("RSA").

³⁹ See Options 9, Section 16.

The Exchange believes that the existing surveillance procedures and reporting requirements at the Exchange are capable of properly identifying disruptive and/or manipulative trading activity. The Exchange also represents that it has adequate surveillances in place to detect potential manipulation, as well as reviews in place to identify continued compliance with the Exchange's listing standards. These procedures monitor market activity via automated surveillance techniques to identify unusual activity in both options and the underlyings, as applicable. The Exchange also notes that large stock holdings must be disclosed to the Commission by way of Schedules 13D or 13G,⁴⁰ which are used to report ownership of stock which exceeds 5% of a company's total stock issue and may assist in providing information in monitoring for any potential manipulative schemes. Further, the Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in equity options. Current margin and risk-based haircut methodologies serve to limit the size of positions maintained by any one account by increasing the margin and/or capital that a Member must maintain for a large position held by itself or by its customer.⁴¹ In addition, Rule 15c3-1⁴² imposes a capital charge on Members to the extent of any margin deficiency resulting from the higher margin requirement.

⁴⁰ 17 CFR 240.13d-1.

⁴¹ See Options 9, Section 3 regarding margin requirements.

⁴² 17 CFR 240.15c3-1.

b. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁴³ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴⁴ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁴⁵ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that increasing the position limit and exercise limit for options on IBIT to 1,000,000 contracts is consistent with the Act. This proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide market participants with the ability to more effectively execute their trading and hedging activities. Also, based on current trading volume, the resulting increase in the position (and exercise) limits for IBIT options may allow Market Makers to maintain their liquidity in these options in amounts commensurate with the continued high consumer demand in IBIT options. The increased position and exercise limits may also encourage other liquidity providers to continue to trade on the Exchange rather than shift their volume to OTC markets, which will enhance the process of

⁴³ 15 U.S.C. 78f(b).

⁴⁴ 15 U.S.C. 78f(b)(5).

⁴⁵ 15 U.S.C. 78(f)(b)(5).

price discovery conducted on the Exchange through increased order flow. Further, this amendment would allow institutional investors to utilize IBIT options for prudent risk management purposes.

In addition, the Exchange believes that the current liquidity in IBIT will continue to mitigate concerns regarding potential manipulation of IBIT options and/or disruption of IBIT upon amending the table of position limits in Supplementary Material .01 to Options 9, Section 13 and the table of exercise limits in Supplementary Material .01 to Options 9, Section 15.

Comparing IBIT's data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables, the Exchange was able to conclude that if a position limit of 1,000,000 contracts were considered, the exercisable risk would represent 7.39995%⁴⁶ of the shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer (whereby Bitcoin is used to create IBIT shares), the position limit can be compared to the total market capitalization of the entire Bitcoin market and in that case, the exercisable risk for options on IBIT would represent less than 0.284% of all Bitcoin outstanding.⁴⁷ This analysis demonstrated that a 1,000,000 contracts position and exercise limits would be appropriate.

Comparing a position limit of 1,000,000 for IBIT options against other options on ETFs with an underlying commodity, namely GLD, SLV and BITO, a position limit exercise in GLD represents 7.31% of the float of GLD, a position limit exercise in SLV represents 4.66% of the float of SLV, and a position limit exercise of BITO represents 17.51% of the float of BITO. In

⁴⁶ This percentage is arrived at with this equation: $(1,000,000 \text{ contract limit} * 100 \text{ share per option} / 1,351,360,000 \text{ shares outstanding})$. This information was captured on September 22, 2025.

⁴⁷ This number was arrived at with this calculation: $(1,000,000 \text{ limit} * 100 \text{ shares per option} * \$63.82 \text{ IBIT NAV}) / (19,923,945 \text{ BTC outstanding} * \$112,748 \text{ BTC price})$.

comparison, a 1,000,000-contract position limit in IBIT options would represent 7.39995%⁴⁸ of the float of IBIT. Consequently, a 1,000,000 IBIT options position limit is generally aligned with the standards applied to GLD, SLV and BITO, and appropriate.

ISE notes that IBIT began trading in penny increments on January 2, 2025 pursuant to the Penny Interval Program.⁴⁹ The Commission noted that evidence and analysis provided in connection with the Penny Pilot demonstrated that the Pilot benefitted investors and other market participants in the form of narrower spreads.⁵⁰ The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests).⁵¹ As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.⁵² IBIT options are

⁴⁸ This percentage is arrived at with this equation: (1,000,000 contract limit * 100 share per option / 1,351,360,000 shares outstanding). This information was captured on September 22, 2025.

⁴⁹ The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Supplementary Material .01(b) to Options 3, Section 3. The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Supplementary Material .01(b) to Options 3, Section 3. See Supplementary Material .01 to ISE Options 3, Section 3.

⁵⁰ See Securities Exchange Act Release No. 88532 (April 1, 2020), 85 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) (“Penny Approval Order”).

⁵¹ Options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF also trade in penny increments based on their liquidity.

⁵² Id. at 19548.

among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments pursuant to the Penny Interval Program. Failing to permit IBIT options to potentially increase position and exercise limits given the trading in finer increments, may artificially inhibit liquidity and create price inefficiency for IBIT options.

Finally, as discussed above, the Exchange's surveillance and reporting safeguards continue to be designed to deter and detect possible manipulative behavior that might arise from increasing or eliminating position and exercise limits in certain classes. The Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in the options on the underlying securities, further promoting just and equitable principles of trading, the maintenance of a fair and orderly market, and the protection of investors.

4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on inter-market competition as the proposal is not competitive in nature. The Exchange expects that all option exchanges will adopt substantively similar proposals, such that the Exchange's proposal would benefit competition. For these reasons, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange's proposal does not burden intra-market competition because all Members would be subject to the position limits in Options 9, Sections 13 and corresponding exercise

limits in Options 9, Section 15. The Exchange believes that the proposed rule change will also provide additional opportunities for market participants to continue to efficiently achieve their investment and trading objectives for equity options on the Exchange.

5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

6. Extension of Time Period for Commission Action

The Exchange does not consent to an extension of the time period for Commission action.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

Not applicable.

8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

Not applicable.

9. Security-Based Swap Submissions Filed Pursuant to Section 3C of the Act

4. Proposed changes from original filing.
5. Text of the proposed rule change.

EXHIBIT 1**SECURITIES AND EXCHANGE COMMISSION****[Release No. 34- ; File No. SR-ISE-2025-26]****Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing of Proposed Rule Change to Amend the Position and Exercise Limits for IBIT Options**

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹, and Rule 19b-4 thereunder,² notice is hereby given that on January 27, 2026, Nasdaq ISE, LLC (“ISE” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 9, Sections 13 and 15 to increase the position and exercise limits for options on iShares Bitcoin Trust ETF (“IBIT”). This Amendment No. 3 replaces and supersedes the original filing as modified by Amendment No. 1 in its entirety and proposes to:

- remove any references to FLEX Options as this rule change, as amended, solely proposes to amend the position and exercise limits for options on IBIT;
- make clear that, as proposed, the new position and exercise limits would not be subject to the six-month review noted in Options 9, Section 13(e);
- correct a percentage related to the exercisable risk of the shares outstanding of IBIT; and

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

- amend language in connection with the approval of the Penny Program.

The text of the proposed rule change is available on the Exchange's Website at <https://listingcenter.nasdaq.com/rulebook/ise/rulefilings>, and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to increase the position and exercise limits for options on IBIT.

IBIT is an Exchange-Traded Fund ("ETF") that holds Bitcoin and is listed on The Nasdaq Stock Market LLC.³ On September 20, 2024, ISE received approval to list options on IBIT.⁴

³ Nasdaq received approval to list and trade Bitcoin-Based Commodity-Based Trust Shares in IBIT pursuant to Rule 5711(d) of Nasdaq. See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (January 17, 2024) (SR-NASDAQ-2023-016) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units). IBIT started trading on January 11, 2024.

⁴ See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, To Permit the Listing and Trading of Options on the iShares Bitcoin Trust) ("IBIT Approval Order"). ISE began trading IBIT options on November 19, 2024.

The position and exercise limits for IBIT options are currently set as stated in Options 9, Sections 13 and 15.⁵

Position limits, and exercise limits, are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. These limits, which are described in ISE Options 9, Sections 13 and 15, are intended to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Position and exercise limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that could be used for legitimate economic purposes.

To achieve this balance, ISE proposes to increase the position limits and exercise limits for options on IBIT to 1,000,000 contracts by noting the proposed position limit in Supplementary Material .01 to Options 9, Section 13 and noting the proposed exercise limits in Supplementary Material .01 to Options 9, Section 15. The position limit for options on IBIT is currently set pursuant to ISE Options 9, Section 13(d) where the largest in capitalization and the most frequently traded stocks and ETFs have an option position limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization stocks and ETFs have position limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, recapitalizations, etc.) on the same side of the market. The Exchange notes that the proposed position limits and exercise limits for options on IBIT are consistent with existing position limits and exercise limits for options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF.

⁵ IBIT currently has a position limit of 250,000 contracts.

Composition and Growth Analysis for Underlying ETFs

As stated above, position (and exercise) limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate the underlying market so as to benefit options positions. The Commission has recognized that these limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market, as well as serve to reduce the possibility for disruption of the options market itself, especially in illiquid classes.⁶

Per the Commission, “rules regarding position and exercise limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options positions.”⁷ For this reason, the Commission requires that “position and exercise limits must be sufficient to prevent investors from disrupting the market for the underlying security by acquiring and exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security.”⁸ The Exchange has observed an ongoing increase in demand in options on IBIT in 2025.⁹ The Exchange believes the current position limit and exercise limit of 250,000 contracts (the highest position limit available pursuant to Options 9, Section 13 and exercise limit pursuant to Options 9, Section 15) will impede trading activity and strategies of investors, such as use of effective hedging vehicles or income generating strategies (e.g., buy-write or put-

⁶ See Securities Exchange Act Release No. 67672 (August 15, 2012), 77 FR 50750 (August 22, 2012) (SR-NYSEAmex-2012-29).

⁷ See supra note 4, IBIT Approval Order, 89 FR 78946.

⁸ See id.

⁹ In 2024, the Exchange filed a rule proposal, which was later approved in 2025, to eliminate the 25,000 contract position and exercise limits for IBIT options and apply the position and exercise limits in ISE Options 9, Sections 13 and 15 to IBIT options utilizing November 25, 2024 data. See Securities Exchange Act Release No. 103564 (July 29, 2025), 90 FR 36229 (August 1, 2025) (SR-ISE-2024-62) (Order Approving a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, Regarding Position and Exercise Limits for Options on the iShares Bitcoin Trust ETF) (“SR-ISE-2024-62”).

write), and the ability of Market Makers to make liquid markets with tighter spreads in IBIT options.

The Exchange believes that increasing the position limit (and exercise limit) for options on IBIT to 1,000,000 contracts would enable liquidity providers to provide additional liquidity to the Exchange, as well as other options exchange on which they participate. As described in further detail below, the Exchange believes that the continuously increasing market capitalization of IBIT options, as well as the highly liquid markets for those securities, reduces the concerns for potential market manipulation and/or disruption in the underlying markets upon increasing position limits, while the rising demand for trading options on IBIT for legitimate economic purposes compels an increase in position limits (and corresponding exercise limits).

IBIT currently qualifies for a 250,000 contract position limit pursuant to the criteria in Options 9, Section 13(d), which requires that, for the most recent six-month period, trading volume for the underlying security be at least 100 million shares.¹⁰ As of September 22, 2025, the market capitalization for IBIT was 86,243,795,200¹¹ with an average daily volume (“ADV”), for the preceding 6 months prior to September 22, 2025 of 44,590,758 shares. By comparison on the same day, the iShares MSCI Emerging Markets (“EEM”) has an ADV of 25,951,152 shares and an AUM of 15,253,164 the iShares China Large-Cap ETF (“FXI”) has an

¹⁰ Options 9, Section 13(d), Equity Option Position Limits, provides at subparagraph (5) that to be eligible for the 250,000 contract limit, either the most recent six (6) month trading volume of the underlying security must have totalled at least 100 million shares or the most recent six-month trading volume of the underlying security must have totalled at least seventy-five (75) million shares and the underlying security must have at least 300 million shares currently outstanding.

¹¹ The market capitalization was determined by multiplying a Net Asset Value of \$63.82 by the number of shares outstanding 1,351,360,000. This figure was acquired as of September 22, 2025. See <https://www.ishares.com/us/products/333011/ishares-Bitcoin-trust-etf>.

ADV 37,112,065 and an AUM of 6,641,144,520, and the iShares MSCI EAFE ETF (“EFA”) has an ADV of 15,253,164 shares and an AUM of 65,309,708,400.¹²

In addition to IBIT’s Options 9, Section 13(d) eligibility for 1,000,000 contracts, the Exchange performed additional analysis with respect to IBIT. First, ISE considered IBIT’s market capitalization and ADV, and prospective position limit in relation to other securities. In measuring IBIT against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations (“OCC”).¹³ This pool of data took into consideration 3,837 options on single stock securities, excluding broad based ETFs.¹⁴ Next, the data was aggregated based on market capitalization and ADV and grouped by option symbol and position limit utilizing statistical thresholds for ADV, based on 180 days, and market capitalization that were one standard deviation¹⁵ above the mean for each position limit category (i.e. 25,000, 50,000 to 52,000, 75,000, 200,000, 250,000 to 375,000, 450,000 to 650,000, 750,000 to 1,250,000 and, and greater than or equal to 2,000,000).¹⁶ This exercise was performed to demonstrate IBIT’s position limit relative to other options symbols in terms of market capitalization and ADV. For reference, the

¹² These figures are from September 22, 2025.

¹³ The computations are based on OCC data from September 22, 2025. Data displaying zero values in market capitalization or ADV were removed.

¹⁴ IBIT has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

¹⁵ The standard deviation added limited utility to the analysis given the heavily skewed distribution of market capitalizations in the single stock securities.

¹⁶ These buckets are based on OCC’s current positions limits. See <https://www.theocc.com/market-data/market-data-reports/series-and-trading-data/position-limits>. ISE Options 9, Section 13(d) sets out position limits for various contracts. For example, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. The Exchange notes that position limits may also be higher due to corporate actions in the underlying equities, such as a stock split.

market capitalization for IBIT was \$86,243,795,200¹⁷ with an ADV, for the preceding 180 days prior to September 22, 2025 of 44,590,758 shares.

ADV data	25k	50k- 52K	75k	200K	250k – 375K	450K- 650K	750K- 1.25mm	>2mm

IBIT rank	1	1	3	3	127	4	6	5
IBIT % rank	99.78%	99.76%	99.52%	98.77%	93.82%	87.10%	45.45%	37.50%

Based on the above table, if IBIT were compared to the 10 stocks that have position limits of 750,000 contracts to 1.25 million contracts it would rank in the 45th percentile for market capitalization and the 91st percentile for ADV.

¹⁷ Net Asset Value of \$63.82 by the number of shares outstanding 1,351,360,000 This figure was acquired as of September 22, 2025. See <https://www.ishares.com/us/products/333011/ishares-Bitcoin-trust-etf>.

The Exchange also analyzed the position limits for IBIT by regressing the median elements from each bucket of market capitalization and 180-day ADV of all non-ETF equities, against their respective position limit figures. From this regression, the Exchange was able to determine the implied coefficients to create a formulaic method for determining an appropriate position limit.¹⁸ The Exchange utilized a linear model approach which incorporated the median metric from each bucket given the data at both the lower end of each position limit bucket and the higher end of each position limit bucket could be considered significant outliers, thereby skewing the results. Below are various linear models utilizing market capitalization and ADV as well as a two factor model to determine the appropriate coefficients when both metrics are incorporated into the same model.¹⁹

Figure 1

Figure 1 utilizes IBIT's market capitalization of 86,243,795,200 to arrive at a modeled position limit of 1,749,876.

¹⁸ The Exchange utilized Excel's Data Analysis Package to model the position limit.

¹⁹ See [id.](#)

Figure 2

Figure 2 utilizes IBIT's ADV of 44,590,758 to arrive at a modeled position limit of 4,675,816.

Based on the aforementioned analysis, the Exchange believes that the proposed 1,000,000 contracts position and exercise limit is appropriate.

Figure 3 shows the results when constructing a two-factor model employing both metrics (180-day ADV and market capitalization). The result is a modeled position limit of 3,871,575.²⁰

Second, ISE reviewed IBIT's data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables. Also, as of September 22, 2025, there were approximately 19,923,945 Bitcoins in circulation.²¹ At a price of \$112,748,²² that equates to a market capitalization of greater than \$2.246 trillion US. If a position limit of 1,000,000 contracts were considered, the exercisable risk would represent 7.39995% %²³ of the outstanding shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer, the position limit can be compared to the total market capitalization of the entire Bitcoin market and in that case, the exercisable risk for options

²⁰ See id.

²¹ See <https://www.coingecko.com/en/coins/Bitcoin>.

²² This is the approximate price of Bitcoin from September 22, 2025.

²³ This percentage is arrived at with this equation: (1,000,000 contract limit * 100 share per option / 1,351,360,000 shares outstanding).

on IBIT would represent 0.284% of all Bitcoin outstanding.²⁴ Assuming a scenario where all options on IBIT shares were exercised given the proposed 1,000,000-contract position limit (and exercise limit), this would have a virtually unnoticed impact on the entire Bitcoin market. This analysis demonstrates that the proposed 1,000,000 per same side position and exercise limit is appropriate for options on IBIT given its liquidity.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked to the CME bitcoin futures contract²⁵ that has a position limit of 2,000 futures.²⁶ On September 5, 2025, CME bitcoin futures settled at \$94,945.²⁷ On September 22, 2025, IBIT settled at \$54.02, which would equate to greater than 17,557,898 shares of IBIT if the CME notional position limit was utilized. Since substantial portions of any distributed options portfolio is likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for bitcoin futures (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 175,578 limit. Of note, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according

²⁴ This number was arrived at with this calculation: $(1,000,000 \text{ limit} * 100 \text{ shares per option} * \$63.82 \text{ IBIT NAV}) / (19,923,945 \text{ BTC outstanding} * \$112,748 \text{ BTC price})$.

²⁵ CME Bitcoin Futures are described in Chapter 350 of CME’s Rulebook.

²⁶ See the Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5 of CME’s Rulebook.

²⁷ 2,000 futures at a 5 bitcoin multiplier (per the contract specifications) equates to \$949,450,000 $(2,000 \text{ contracts} * 5 \text{ BTC per contract} * \$94,945 \text{ price of November BTC future})$ of notional value.

to an aggregation ratio(s).²⁸ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.²⁹ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading, but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Based on the aforementioned analysis, the Exchange believes that the proposed 1,000,000 contracts position and exercise limit is appropriate.

Fourth, ISE analyzed a position limit and exercise limit of 1,000,000 for IBIT options against other options on ETFs with an underlying commodity, namely SPDR Gold Shares ("GLD"), iShares Silver Trust ("SLV"), and ProShares Bitcoin ETF ("BITO").³⁰ GLD has a float of 342 million shares³¹ and a position limit of 250,000 contract. SLV has a float of 536 million shares,³² and a position limit of 250,000 contracts. Finally, BITO has 142.79 million shares outstanding³³ and a position limit of 250,000 contracts. As previously noted, position limits and exercise limits are designed to limit the number of options contracts traded on the

²⁸ See <https://www.cmegroup.com/education/courses/market-regulation/position-limits/position-limits-aggregation-of-contracts-and-table.htm>.

²⁹ Id.

³⁰ GLD, SLV and BITO each hold one asset in trust similar to IBIT.

³¹ See <https://www.ssga.com/us/en/intermediary/etfs/spdr-gold-shares-gld>.

³² See <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

³³ See <https://www.marketwatch.com/investing/fund/bit0>.

exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. A position limit exercise in GLD would represent 7.31% of the float of GLD; a position limit exercise in SLV would represent 4.66% of the float of SLV, and a position limit exercise of BITO would represent 17.51% of the float of BITO. In comparison, a 1,000,000-contract position limit in IBIT options would represent 7.39995%³⁴ of the float of IBIT. Consequently, the 1,000,000 proposed IBIT options position and exercise limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate.

Fifth, ISE notes that IBIT began trading in penny increments as of January 2, 2025 pursuant to the Penny Interval Program.³⁵ The Commission noted that evidence and analysis provided in connection with the Penny Pilot demonstrated that the Pilot benefitted investors and other market participants in the form of narrower spreads.³⁶ The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class

³⁴ This percentage is arrived at with this equation: $(1,000,000 \text{ contract limit} * 100 \text{ share per option} / 1,351,360,000 \text{ shares outstanding})$. This information was captured on September 22, 2025.

³⁵ The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Supplementary Material .01(b) to Options 3, Section 3. The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Supplementary Material .01(b) to Options 3, Section 3. See Supplementary Material .01 to ISE Options 3, Section 3.

³⁶ See Securities Exchange Act Release No. 88532 (April 1, 2020), 85 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) (“Penny Approval Order”).

experienced a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.³⁷ IBIT options is among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments. Failing to increase position and exercise limits for IBIT options, now that it is trading in finer increments, may artificially inhibit liquidity and create price inefficiency. The Exchange notes that options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF also trade in penny increments based on their liquidity.

The Exchange believes that IBIT options have more than sufficient liquidity to garner an increased position and exercise limit of 1,000,000 contracts. The Exchange believes that any concerns related to manipulation and protection of investors are mollified by the significant liquidity provision in IBIT. The Exchange states that, as a general principle, increases in active trading volume and deep liquidity of the underlying securities do not lead to manipulation and/or disruption.

The Exchange believes that increasing the position (and exercise) limits for IBIT options would lead to a more liquid and competitive market environment for IBIT options, which will benefit customers that trade these options. Further, the reporting requirement for such options would remain unchanged. Thus, the Exchange will still require that each Member that maintains positions in impacted options on the same side of the market, for its own account or for the account of a customer, report certain information to the Exchange. This information includes, but would not be limited to, the options' positions, whether such positions are hedged and, if so, a description of the hedge(s). Market Makers would continue to be exempt from this reporting

³⁷ Id. at 19548.

requirement, however, the Exchange may access Market Maker position information.³⁸

Moreover, the Exchange's requirement that Members file reports with the Exchange for any customer who held aggregate large long or short positions on the same side of the market of 200 or more option contracts of any single class for the previous day will remain at this level and will continue to serve as an important part of the Exchange's surveillance efforts.³⁹

The Exchange also has no reason to believe that the growth in trading volume in IBIT will not continue. Rather, the Exchange expects continued options volume growth in IBIT as opportunities for investors to participate in the options markets increase and evolve. The Exchange believes that the current position and exercise limits in IBIT options are restrictive and will hamper the listed options markets from being able to compete fairly and effectively with the over-the-counter ("OTC") markets. OTC transactions occur through bilateral agreements, the terms of which are not publicly disclosed to the marketplace. As such, OTC transactions do not contribute to the price discovery process on a public exchange or other lit markets. The Exchange believes that without the proposed changes to position and exercise limits for IBIT options, market participants will find the 250,000-contract position limit an impediment to their business and investment objectives as well as an impediment to efficient pricing. As such, market participants may find the less transparent OTC markets a more attractive alternative to achieve their investment and hedging objectives, leading to a retreat from the listed options markets, where trades are subject to reporting requirements and daily surveillance.

³⁸ OCC through the Large Option Position Reporting ("LOPR") system acts as a centralized service provider for Member compliance with position reporting requirements by collecting data from each Member, consolidating the information, and ultimately providing detailed listings of each Member's report to the Exchange, as well as Financial Industry Regulatory Authority, Inc. ("FINRA"), acting as its agent pursuant to a regulatory services agreement ("RSA").

³⁹ See Options 9, Section 16.

The Exchange believes that the existing surveillance procedures and reporting requirements at the Exchange are capable of properly identifying disruptive and/or manipulative trading activity. The Exchange also represents that it has adequate surveillances in place to detect potential manipulation, as well as reviews in place to identify continued compliance with the Exchange's listing standards. These procedures monitor market activity via automated surveillance techniques to identify unusual activity in both options and the underlyings, as applicable. The Exchange also notes that large stock holdings must be disclosed to the Commission by way of Schedules 13D or 13G,⁴⁰ which are used to report ownership of stock which exceeds 5% of a company's total stock issue and may assist in providing information in monitoring for any potential manipulative schemes. Further, the Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in equity options. Current margin and risk-based haircut methodologies serve to limit the size of positions maintained by any one account by increasing the margin and/or capital that a Member must maintain for a large position held by itself or by its customer.⁴¹ In addition, Rule 15c3-1⁴² imposes a capital charge on Members to the extent of any margin deficiency resulting from the higher margin requirement.

⁴⁰ 17 CFR 240.13d-1.

⁴¹ See Options 9, Section 3 regarding margin requirements.

⁴² 17 CFR 240.15c3-1.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁴³ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴⁴ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁴⁵ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that increasing the position limit and exercise limit for options on IBIT to 1,000,000 contracts is consistent with the Act. This proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide market participants with the ability to more effectively execute their trading and hedging activities. Also, based on current trading volume, the resulting increase in the position (and exercise) limits for IBIT options may allow Market Makers to maintain their liquidity in these options in amounts commensurate with the continued high consumer demand in IBIT options. The increased position and exercise limits may also encourage other liquidity providers to continue to trade on the Exchange rather than shift their volume to OTC markets, which will enhance the process of

⁴³ 15 U.S.C. 78f(b).

⁴⁴ 15 U.S.C. 78f(b)(5).

⁴⁵ 15 U.S.C. 78(f)(b)(5).

price discovery conducted on the Exchange through increased order flow. Further, this amendment would allow institutional investors to utilize IBIT options for prudent risk management purposes.

In addition, the Exchange believes that the current liquidity in IBIT will continue to mitigate concerns regarding potential manipulation of IBIT options and/or disruption of IBIT upon amending the table of position limits in Supplementary Material .01 to Options 9, Section 13 and the table of exercise limits in Supplementary Material .01 to Options 9, Section 15.

Comparing IBIT's data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables, the Exchange was able to conclude that if a position limit of 1,000,000 contracts were considered, the exercisable risk would represent 7.39995%⁴⁶ of the shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer (whereby Bitcoin is used to create IBIT shares), the position limit can be compared to the total market capitalization of the entire Bitcoin market and in that case, the exercisable risk for options on IBIT would represent less than 0.284% of all Bitcoin outstanding.⁴⁷ This analysis demonstrated that a 1,000,000 contracts position and exercise limits would be appropriate.

Comparing a position limit of 1,000,000 for IBIT options against other options on ETFs with an underlying commodity, namely GLD, SLV and BITO, a position limit exercise in GLD represents 7.31% of the float of GLD, a position limit exercise in SLV represents 4.66% of the float of SLV, and a position limit exercise of BITO represents 17.51% of the float of BITO. In

⁴⁶ This percentage is arrived at with this equation: $(1,000,000 \text{ contract limit} * 100 \text{ share per option} / 1,351,360,000 \text{ shares outstanding})$. This information was captured on September 22, 2025.

⁴⁷ This number was arrived at with this calculation: $(1,000,000 \text{ limit} * 100 \text{ shares per option} * \$63.82 \text{ IBIT NAV}) / (19,923,945 \text{ BTC outstanding} * \$112,748 \text{ BTC price})$.

comparison, a 1,000,000-contract position limit in IBIT options would represent 7.39995%⁴⁸ of the float of IBIT. Consequently, a 1,000,000 IBIT options position limit is generally aligned with the standards applied to GLD, SLV and BITO, and appropriate.

ISE notes that IBIT began trading in penny increments on January 2, 2025 pursuant to the Penny Interval Program.⁴⁹ The Commission noted that evidence and analysis provided in connection with the Penny Pilot demonstrated that the Pilot benefitted investors and other market participants in the form of narrower spreads.⁵⁰ The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests).⁵¹ As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.⁵² IBIT options are

⁴⁸ This percentage is arrived at with this equation: (1,000,000 contract limit * 100 share per option / 1,351,360,000 shares outstanding). This information was captured on September 22, 2025.

⁴⁹ The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Supplementary Material .01(b) to Options 3, Section 3. The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Supplementary Material .01(b) to Options 3, Section 3. See Supplementary Material .01 to ISE Options 3, Section 3.

⁵⁰ See Securities Exchange Act Release No. 88532 (April 1, 2020), 85 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) (“Penny Approval Order”).

⁵¹ Options on iShares MSCI Emerging Markets, iShares China Large-Cap ETF and iShares MSCI EAFE ETF also trade in penny increments based on their liquidity.

⁵² Id. at 19548.

among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments pursuant to the Penny Interval Program. Failing to permit IBIT options to potentially increase position and exercise limits given the trading in finer increments, may artificially inhibit liquidity and create price inefficiency for IBIT options.

Finally, as discussed above, the Exchange's surveillance and reporting safeguards continue to be designed to deter and detect possible manipulative behavior that might arise from increasing or eliminating position and exercise limits in certain classes. The Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in the options on the underlying securities, further promoting just and equitable principles of trading, the maintenance of a fair and orderly market, and the protection of investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on inter-market competition as the proposal is not competitive in nature. The Exchange expects that all option exchanges will adopt substantively similar proposals, such that the Exchange's proposal would benefit competition. For these reasons, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange's proposal does not burden intra-market competition because all Members would be subject to the position limits in Options 9, Sections 13 and corresponding exercise

limits in Options 9, Section 15. The Exchange believes that the proposed rule change will also provide additional opportunities for market participants to continue to efficiently achieve their investment and trading objectives for equity options on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-ISE-2025-26 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-ISE-2025-26. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-ISE-2025-26 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵³

Sherry R. Haywood,

Assistant Secretary.

⁵³ 17 CFR 200.30-3(a)(12).

EXHIBIT 4

Exhibit 4 shows the changes proposed in this Amendment No. 3 with the proposed changes in the original filing shown as if adopted.

Proposed deletions appear bolded with a strikethrough.
