

acts and practices because it highlights the parties for whom additional procedures are required because they do not maintain relationships with the end customer (*i.e.*, routing brokers) and still requires the RMO to follow such procedures to ensure that such orders qualify as Retail Orders. As proposed, however, an RMO would not be required to follow such procedures, including obtaining annual attestations, to the extent such RMO actually knows the end customer and carries the account of such customer and thus can itself confirm that the orders qualify as Retail Orders.

The Exchange believes that the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system because it will allow RMOs that carry retail customer accounts to participate in the Program without imposing additional attestation requirements that the Exchange did not initially intend to impose upon them. By removing impediments to participation in the Program, the proposed change would permit expanded access of retail customers to the Program.

B. Self-Regulatory Organization's Statement on Burden on Competition

BX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The Exchange believes that the amendment, by increasing the level of participation in the Program, will increase the level of competition around retail executions. The Exchange believes that the transparency and competitiveness of operating a program such as the Program on an exchange market would result in better prices for retail investors and benefits retail investors by expanding the capabilities of Exchanges to encompass practices currently allowed on non-exchange venues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii)¹³ of the Act and Rule

19b-4(f)(6) thereunder.¹⁴ Because the proposed rule change does not (i) significantly affect the protection of investors or the public interest, (ii) impose any significant burden on competition, and (iii) become operative for 30 days after its filing date, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to 19(b)(3)(A)¹⁵ of the Act and Rule 19b-4(f)(6) thereunder.¹⁶

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BX-2015-086 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-BX-2015-086. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BX-2015-086, and should be submitted on or before February 1, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76833; File No. SR-NASDAQ-2015-159]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing of Proposed Rule Change To Implement Additional Price Protections in the Opening Process

January 5, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 23, 2015, The NASDAQ Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹⁴ 17 CFR 240.19b-4(f)(6).

¹⁵ 15 U.S.C. 78s(b)(3)(A).

¹⁶ 17 CFR 240.19b-4(f)(6).

¹⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

¹³ 15 U.S.C. 78s(b)(3)(A)(iii).

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to add new paragraph (F) to Rule 4752(d)(2), concerning the opening process.

The text of the proposed rule change is available on the Exchange's Web site at <http://nasdaq.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to enhance the price protections provided by Rule 4752(d) in the operation of Nasdaq Opening Cross, Nasdaq's process for opening the market for trading System securities.

Background

Rule 4752 concerns Nasdaq's opening process and paragraph (d) of the rule sets forth the processing of the Opening Cross. Specifically, the rule provides that the Opening Cross is initiated at 9:30 a.m. ET, at which time the System attempts to open a security at the price that maximizes the number of shares of

MOO,³ LOO,⁴ OIO,⁵ Early Market Hours orders,⁶ and executable quotes and orders to be executed in the Nasdaq Market Center.⁷ If the System determines that more than one price exists that would maximize such quotes and orders to be executed, the Opening Cross will occur at the price that minimizes any Imbalance.⁸ If the System determines that more than one price exists that would minimize an Imbalance, the Opening Cross will occur at the entered price at which shares will remain unexecuted in the cross.⁹ If the System determines that more than one price exists whereby shares will remain unexecuted in the cross, the Opening Cross will occur at the price that minimizes the distance from the bid-ask midpoint of the inside quotation prevailing at 9:30 a.m.¹⁰

When the Opening Cross price is calculated, Nasdaq applies a boundary within which the cross must execute to ensure that the price derived does not exceed a price reasonably tied to the prevailing market at the time.

³ A "Market On Open" or "MOO" order is an Order Type entered without a price that may be executed only during the Nasdaq Opening Cross. Generally, MOO Orders may be entered, cancelled, and/or modified between 4 a.m. ET and immediately prior to 9:28 a.m. ET. An MOO Order may not be cancelled or modified at or after 9:28 a.m. ET. An MOO Order shall execute only at the price determined by the Nasdaq Opening Cross. See Rule 4702(b)(8).

⁴ A "Limit On Open Order" or "LOO Order" is an Order Type entered with a price that may be executed only in the Nasdaq Opening Cross, and only if the price determined by the Nasdaq Opening Cross is equal to or better than the price at which the LOO Order was entered. Subject to the qualifications provided below [sic], LOO Orders may be entered, cancelled, and/or modified between 4 a.m. ET and immediately prior to 9:28 a.m. ET. See Rule 4702(b)(9).

⁵ An "Opening Imbalance Only Order" or "OIO Order" is an Order Type entered with a price that may be executed only in the Nasdaq Opening Cross and only against MOO Orders, LOO Orders, or Early Market Hours Orders (as defined in Rule 4752). OIO Orders may be entered between 4:00 a.m. ET until the time of execution of the Nasdaq Opening Cross, but may not be cancelled or modified at or after 9:28 a.m. ET. If the entered price of an OIO Order to buy (sell) is higher than (lower than) the highest bid (lowest offer) on the Nasdaq Book, the price of the OIO Order will be modified repeatedly to equal the highest bid (lowest offer) on the Nasdaq Book; provided, however, that the price of the Order will not be moved beyond its stated limit price. See Rule 4702(b)(10).

⁶ An Early Market Hours Order is a Market Hours Order that is entered into the system prior to 9:28 a.m. and which is treated as an Opening Imbalance Only order [sic], as appropriate, for the purposes of the Nasdaq Opening Cross. A Market Hours Order is any order that may be entered into the system and designated with a time-in-force of MIOC, MDAY, MGTC. See Rule 4752(a)(7). See also Rules 4703(a) for a discussion of the Time in Force Order attribute, including MIOC, MDAY, and MGTC.

⁷ See Rule 4752(d)(2)(A).

⁸ See Rule 4752(d)(2)(B).

⁹ See Rule 4752(d)(2)(C).

¹⁰ See Rule 4752(d)(2)(D).

Specifically, Nasdaq applies a percentage based threshold ("Threshold Percentage") to a benchmark ("Benchmark Value") that, when applied to an individual security, determines the price range that a security may cross ("Threshold Range"), outside of which the opening price of a security may not occur.¹¹ If an Opening Cross price of a security would otherwise be outside of the Threshold Range, Nasdaq will adjust the Opening Cross price of the security to a price within the Threshold Range that best satisfies the normal process for determining the Opening Cross price.¹² This change happens automatically prior to execution of the Opening Cross, and does not involve any human intervention. All unexecuted shares designated to expire upon the conclusion of the Opening Cross,¹³ including those that fall outside of the Threshold Range, are cancelled.

The Threshold Percentage and Benchmark Value are set by Nasdaq officials in advance and communicated to Participants.¹⁴ Nasdaq may adjust the Threshold Percentage based on Nasdaq's experience with the Opening Cross and on unusual market conditions, such as certain options and derivatives expiration days that are heavily affected by the opening price of Nasdaq securities. Nasdaq publishes the Benchmark Value and Threshold Percentages via its public NasdaqTrader Web site, and sets the Threshold Percentage so that repricing of a security is rare.¹⁵ Currently, Nasdaq applies a Threshold Percentage of 10%, which is applied to the Nasdaq Best Bid and Offer ("QBBO") midpoint and is added to the Nasdaq Offer and subtracted from the Nasdaq Bid to establish the threshold price range. For example, if the QBBO is \$10.00 × \$11.00, then the midpoint equals 10.50 and the Threshold Percentage is 10%, resulting in a threshold value of \$1.05 (10% of \$10.50 = \$1.05). This value is then added to the offer and subtracted from the bid to obtain the cross's threshold range. In this example, it would result

¹¹ See Rule 4752(d)(2)(E).

¹² See Rules 4752(d)(2)(A)–(D).

¹³ These are: MOO, LOO, OIO, and Early Market Hours Orders designated to participate in the Opening Cross. Prior to the Opening Cross, the Exchange maintains a continuous order book and an Opening Cross order book. Orders in the Opening Cross order book may execute only in the Opening Cross process, while Orders in the continuous book may execute during pre-market hours trading, in the Opening Cross, or in regular market hours trading if the Order has a time-in-force that will allow it to remain active.

¹⁴ As defined by Rule 4701(c).

¹⁵ See http://www.nasdaqtrader.com/content/ProductsServices/Trading/Crosses/openclose_faqs.pdf.

in a lower threshold of \$8.95 (\$10.00 – \$1.05 = \$8.95) and an upper threshold of \$12.05 (\$11.00 + \$1.05 = \$12.05), thus creating a range of \$8.95 to \$12.05, within which the cross can occur. This means \$8.95 is the lowest price at which the cross can occur and \$12.05 is the highest price at which it can occur. The threshold range is dynamic; as the QBBO changes, the threshold price range changes.

The current price adjustment process under Rule 4752(d)(2)(E) is effective at ensuring the opening price of a security is within a certain range of the QBBO immediately prior to the initiation of the cross in the security; however, the current process does not prevent a cross from occurring at an erroneous price caused by an order or quote entered into the continuous pre-market trading book by a Participant in error that significantly skews the Opening Cross price of a security. This scenario could cause the QBBO to be excessively wide, with one side of the bid/offer significantly distant from the normal range and not representative of the true interest in the security. Nonetheless, the price adjustment process under Rule 4752(d)(2)(E) would allow the Opening Cross price to be set at an erroneous level because it would set the Benchmark Value at the midpoint between the erroneously-priced side of the market and the non-erroneously priced contra side. To illustrate, assume an extreme example as follows: if a security has a bid of \$10 set by an Order to buy 100 shares at \$10 in pre-market trading with no offer interest until 9:29 a.m., when a Participant erroneously enters an Order to sell 100 shares at \$1100, under the current opening process the Benchmark Value of that security would be the midpoint price of \$555, which would create a threshold range of \$0.0001 by \$1155.50.¹⁶ Under such extreme circumstances a mispriced open could occur, in which case the parties to an erroneous execution would have to avail themselves of the clearly erroneous trade nullification process of Rule 11890.¹⁷

New Protection

Nasdaq is proposing an additional price protection process designed to

¹⁶ The Exchange will not allow the lower threshold to be a negative amount and will set the lower range value to the lowest value possible, which is \$0.0001.

¹⁷ The terms of a transaction executed on Nasdaq are “clearly erroneous” when there is an obvious error in any term, such as price, number of shares or other unit of trading, or identification of the security. A transaction made in clearly erroneous error and cancelled by both parties or determined by Nasdaq to be clearly erroneous will be removed from the consolidated tape. See Rule 11890(a)(1).

avoid mispriced Opening Crosses and the use of the clearly erroneous post-trade nullification process. Once a security has an Opening Cross price set based on the process under Rule 4752(d)(2)(A)–(E), Nasdaq will require the security to pass at least one of three new “tests” in order for the Opening Cross to occur. If a security does not pass any of the three tests no Opening Cross will occur in that security, all Orders in the Opening Cross¹⁸ will be cancelled back to the Participants, and regular market hours trading will begin.

The three new tests compare the Opening Cross price as calculated under the current rule to a reference price to ensure that the Opening Cross price is reasonably related to the market and not the product of erroneous Order entry. The reference price range is calculated under each test by applying a threshold set by Nasdaq officials in advance and communicated to Participants (“Price Test Thresholds”). The Price Test Thresholds, like the current Threshold Percentage, will be published via Nasdaq’s public NasdaqTrader Web site. Nasdaq may apply different Price Test Thresholds to each of the Opening Cross Price Tests. The Price Test Threshold is applied to different measures under each of the new tests to calculate the range within which the Opening Cross price must fall to pass the test (“Price Test Threshold Range”). Nasdaq is initially setting each of the Price Test Thresholds uniformly at the greater of \$0.50 or 10%; however, Nasdaq may adjust the Price Test Thresholds independently of one another.

Opening Cross Price Test A requires the Opening Cross price of a Nasdaq listed security, other than newly-listed Exchange Traded Products (“ETPs”), to be within a Price Test Threshold Range established by adding and subtracting the Price Test Threshold from the security’s prior day Nasdaq Official Closing Price (“NOCP”). Non-Nasdaq listed securities must have an Opening Cross price within a Price Test Threshold Range established by adding and subtracting the Price Test Threshold from the security’s prior day consolidated closing price. Unlike newly-listed company stocks that begin trading at some point after the stock market has opened, newly-listed ETPs usually begin trading in the premarket session prior to regular market hours trading on the security’s initial day of trading and do not have a prior day’s

¹⁸ See note 13 above. Orders entered in the continuous book eligible to trade in the pre-market session prior to the opening of the security would not be cancelled but would rather continue to rest on the continuous book for potential participation in regular market hours trading.

consolidated closing price. For such securities, the Price Test Threshold Range is established by adding and subtracting the Price Test Threshold from the offering price. If the Nasdaq Opening Cross price is higher or lower than the Price Test Threshold Range established under this test, or if a non-ETP Nasdaq listed security does not have a previous day’s closing price,¹⁹ the security fails the test and Opening Cross Price Test B is performed.

Opening Cross Price Test B requires the Opening Cross price of a security to be within a Price Test Threshold Range established by adding and subtracting the Price Test Threshold from the security’s Nasdaq last sale (either round or odd lot) occurring after 9:15 a.m. ET but prior to the Opening Cross. If the Opening Cross price is higher or lower than the Price Test Threshold Range established under this test, or if there is no Nasdaq last sale,²⁰ the security fails the test and Opening Cross Price Test C is performed.

Opening Cross Price Test C requires the Opening Cross price to fall within the Price Test Threshold Range established by adding and subtracting the Price Test Threshold from the Nasdaq best bid (for Opening Cross prices that would be higher than the security’s closing price as established in Test A) or Nasdaq best offer (for opening cross prices that would be lower than the security’s closing price as established in Test A). For purposes of this test, if a security does not have a NOCP or consolidated closing price, as applicable, for the previous trading day Nasdaq will use a price of \$0. If the Nasdaq Opening Cross price is higher or lower than the Opening Cross price range established under this test all Orders in the Opening Cross²¹ will be cancelled back to Participants, no Opening Cross will occur, and the security will open for regular market hours trading.

Using the example above where the QBBO is \$10 × \$11 and Opening Price Range is \$8.95 to \$12.05, if the Opening Cross price is calculated to be \$10.50 then the security would move on to the Opening Cross eligibility test process. Under Opening Cross Price Test A, if the security had a NOCP of \$12.50 then the Price Test Threshold used would be 10% (10% of \$12.50 = \$1.25, which is greater than \$0.50) and the Price Test Threshold Range would be \$11.25 to \$13.75 (\$12.50 – \$1.25 = \$11.25 and

¹⁹ For example, a security may not have a NOCP due to a unit separation.

²⁰ A security may not have a Nasdaq last sale because there was no trading in the security during the premarket session.

²¹ See note 18 above.

\$12.50 + \$1.25 = \$13.75). Because the Opening Cross price is less than the lower threshold (\$10.50 < \$11.25), the security fails Opening Cross Price Test A and Opening Cross Price Test B is performed.

Under Opening Cross Price Test B, if the last sale at 9:20 a.m. is \$11.90, the Price Test Threshold would be 10% (10% of \$11.90 = \$1.19, which is greater than \$0.50) and the Price Test Threshold Range would be \$10.71 to \$13.09 (\$11.90 - \$1.19 = \$10.71 and \$11.90 + \$1.19 = \$13.09). Because the Opening Cross price is less than the lower threshold (\$10.50 < \$10.71), the security fails Opening Cross Price Test B and Opening Cross Price Test C is performed.

Under Opening Cross Price Test C, since the Opening Cross price is lower than the NOCP (\$10.50 < \$12.50), the QBBO offer price of \$11 would be used to calculate the Price Test Threshold Range, which would result in a Price Test Threshold of 10% (10% of \$11 = \$1.10, which is greater than \$0.50) and a Price Test Threshold Range of \$9.90 to \$12.10 (\$11 - \$1.10 = \$9.90 and \$11 + \$1.10 = \$12.10). Because the Opening Cross price is within the Price Test Threshold Range, the security passes the test and the Opening Cross may proceed.

Accordingly, these new protections will mitigate situations in which the Opening Cross price may be erroneous. As a result, the changes will support fair and orderly markets.

Implementation

Nasdaq is proposing to implement the proposed change in a measured approach over the course of approximately four weeks. Although Nasdaq does not foresee any technical issues with implementation of the proposed changes, they affect a fundamental process in the operation of an orderly market. As a result, the Exchange believes it should implement the changes in stages. The Exchange will use a rollout schedule that will start with a small number of securities (e.g., 5–50) with each stage increasing the number of securities to be rolled out. The implementation details will be published via an Exchange Trader Alert and be posted on the NasdaqTrader Web site. The Exchange believes that this measured approach will minimize risk to the overall market.

2. Statutory Basis

The Exchange believes that its proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities

exchange, and, in particular, with the requirements of Section 6(b) of the Act.²² Specifically, the proposal is consistent with Section 6(b)(5) of the Act,²³ because it would promote just and equitable principles of trade, remove impediments to, and perfect the mechanism of, a free and open market and a national market system.

The Exchange believes that the proposed change will promote just and equitable principles of trade because it will implement a process designed to prevent Opening Crosses to occur [sic] at erroneous prices. As explained, under the current process an erroneous order or quote may significantly skew the current Benchmark Value that is used to create a boundary for the Opening Cross Price. This may then lead to the Opening Cross price would result [sic] in a temporary price dislocation from normal pricing and typically the use of the clearly erroneous trade nullification process under Rule 11890.

The Exchange considers that a better approach is to implement a system of tests, as proposed herein, that would not allow an erroneous order or quote affect the opening of a security. The proposed change, moreover, would mitigate the likelihood of an erroneous execution occurring in the Opening Cross, since all Orders in the Opening Cross would be cancelled. There would be no need then to use the clearly erroneous trade nullification process because no such trade would occur. Thus, the proposed rule change also protects investors, by avoiding erroneous transactions, which are disruptive to individual investors and the market overall.

The proposal also promotes just and equitable principles of trade and further perfects mechanism of fair and orderly markets in that it promotes transparency and uniformity in handling erroneous trades in the Opening Cross.

Finally, implementing the proposed changes in a phased approach promotes just and equitable principles of trade, further improves participating [sic] in fair and orderly markets, and serves to protect investors because it will limit the potential disruption to the market to a subset of the total number of securities in the opening cross should the Exchange experience a technical issue with the implementation.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change implicates any competitive issues. The proposed change implements changes that will

benefit all market participants by avoiding Opening Prices that are not reasonably related to bona fide market interest. Avoiding such prices will ensure that the information on which market participants make investment decisions is accurate and representative of investors' interest. As such, the proposed changes should not place a burden on competition whatsoever.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR–NASDAQ–2015–159 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.
- All submissions should refer to File No. SR–NASDAQ–2015–159. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements

²² 15 U.S.C. 78f(b).

²³ 15 U.S.C. 78f(b)(5).

with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-NASDAQ-2015-159, and should be submitted on or before February 1, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-440, OMB Control No. 3235-0496]

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Appendix F to Rule 15c3-1.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) ("PRA"), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information provided for in Appendix F to Rule 15c3-1 ("Appendix F" or "Rule 15c3-1f") (17 CFR 240.15c3-1f) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget ("OMB") for extension and approval.

Appendix F requires a broker-dealer choosing to register, upon Commission approval, as an OTC derivatives dealer to develop and maintain an internal risk management system based on Value-at-Risk ("VaR") models. It is anticipated that a total of one (1) broker-dealer registering as an OTC derivatives dealer will spend 1,000 hours on a one-time basis complying with the system development requirements of Rule 15c3-1f, for an estimated one-time initial startup burden of approximately 1,000 hours. Appendix F also requires the OTC derivatives dealer to maintain its system model according to certain prescribed standards. It is anticipated that the four (4) OTC derivatives dealers currently registered with the Commission will each spend 1,000 hours per year maintaining the system model required by Rule 15c3-1f, for an estimated recurring annual burden of approximately 4,000 hours. It is anticipated that the one (1) broker-dealer registering as an OTC derivatives dealer will spend 1,000 hours maintaining the system model required by Rule 15c3-1f in each year following its registration. Thus, the total industry-wide burden is estimated to be approximately 5,000 hours (4,000 hours + 1,000 hours) for the first year and 5,000 hours for each subsequent year.¹

The records required to be kept pursuant to Appendix F and results of periodic reviews conducted pursuant to Rule 15c3-4 generally must be preserved under Rule 17a-4 of the Exchange Act (17 CFR 240.17a-4) for a period of not less than three years, the first two years in an easily accessible place. The Commission will not generally publish or make available to any person notices or reports received pursuant to the Rule. The statutory basis for the Commission's refusal to disclose such information to the public is the exemption contained in Section (b)(4) of the Freedom of Information Act (5 U.S.C. 552), which essentially provides that the requirement of public dissemination does not apply to commercial or financial information which is privileged or confidential.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility;

¹ The Commission estimates that a total of five entities will be registered as OTC derivatives dealers at the end of the next three years, consisting of the four current OTC derivatives dealers and one anticipated registrant. This is in contrast with the prior estimate of eight OTC derivatives dealers, consisting of four current OTC derivatives dealers and four anticipated registrants.

(b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31952; File No. 812-14519]

Northern Lights Fund Trust, et al.; Notice of Application

January 4, 2016.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application for an order under section 12(d)(1)(f) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 12(d)(1)(A), (B), and (C) of the Act and under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (2) of the Act. The requested order would permit certain registered open-end investment companies to acquire shares of certain registered open-end investment companies, registered closed-end investment companies, business development companies, as defined in section 2(a)(48) of the Act, and unit investment trusts (collectively, "Underlying Funds") that are within and outside the same group of investment companies as the acquiring investment companies, in excess of the limits in section 12(d)(1) of the Act.

Applicants: Northern Lights Fund Trust (the "Trust"), a Delaware statutory

²⁴ 17 CFR 200.30-3(a)(12).
