Signature

Pursuant to the requirements of the Securities Exchange Act of 1934,

has duly caused this filing to be signed on its behalf by the undersigned thereunto duly authorized.

Date 11/02/2020
By John Zecca

EVP and Chief Legal Counsel

NOTE: Clicking the button at right will digitally sign and lock this form. A digital signature is as legally binding as a physical signature, and once signed, this form cannot be changed.
### Partial Amendment

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.
1. **Text of the Proposed Rule Change**

   (a) The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)\(^1\) and Rule 19b-4 thereunder,\(^2\) is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposal to amend the Exchange’s transaction credits at Equity 7, Section 118, as described further below.

   A notice of the proposed rule change for publication in the Federal Register is attached as Exhibit 1. The text of the proposed rule change is attached as Exhibit 5.

   (b) Not applicable.

   (c) Not applicable.

2. **Procedures of the Self-Regulatory Organization**

   The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”) on September 26, 2019. Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

   Questions and comments on the proposed rule change may be directed to:

   Brett Kitt  
   AVP, Principal Associate General Counsel  
   Nasdaq, Inc.  
   (301) 978-8183

3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The Exchange proposes to amend its schedule of credits at Equity 7, Section 118, to add a new credit for executing orders in securities in all three Tapes.

Presently, the Exchange offers its members a credit of $0.00295 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.70% or more of Consolidated Volume\(^3\) during the month; (ii) execute 0.20% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market Center MPIDs. The purpose of this credit is to incent members to engage in substantial volumes of liquidity adding and removal activity on the Exchange during a month and, in particular, to execute a substantial percentage of such volume through the provision of midpoint and Midpoint Extended Life Orders, or “M-ELOs.”

The Exchange now proposes to add a new, higher credit for members that meet similar criteria, albeit with higher volume requirements. Specifically, the Exchange

\(^3\) Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.
proposes to provide a new credit of $0.00305 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.20% or more of Consolidated Volume\(^4\) during the month; (ii) execute 0.40% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market Center MPIDs.

In incentivizing members to increase the extent of their liquidity adding and removal activity on the Exchange, and the extent of their midpoint and M-ELO execution activity on the Exchange, the Exchange intends to improve the overall quality and attractiveness of the market.

**Impact of the Changes**

Those participants that act as significant providers and removers of liquidity, and who execute substantial volumes of midpoint and M-ELO orders on the Exchange, will benefit directly from the proposed addition of the new credit. Other participants will also benefit from the new credit insofar as any increase in liquidity adding and removal activity on the Exchange will improve the overall quality of the market, to the benefit of all members.

\(^4\) Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.
The Exchange notes that its proposals are not otherwise targeted at or expected to be limited in their applicability to a specific segment of market participants nor will they apply differently to different types of market participants.

b. **Statutory Basis**

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,\(^5\) in general, and further the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,\(^6\) in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposal is also consistent with Section 11A of the Act relating to the establishment of the national market system for securities.

**The Proposal is Reasonable**

The Exchange’s proposed change to its schedule of credits is reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ … As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can

\(^6\) 15 U.S.C. 78f(b)(4) and (5).
afford to take its market share percentages for granted’ because ‘no exchange possesses a
monopoly, regulatory or otherwise, in the execution of order flow from broker
dealers’….’”7

The Commission and the courts have repeatedly expressed their preference for
competition over regulatory intervention in determining prices, products, and services in
the securities markets. In Regulation NMS, while adopting a series of steps to improve
the current market model, the Commission highlighted the importance of market forces in
determining prices and SRO revenues and, also, recognized that current regulation of the
market system “has been remarkably successful in promoting market competition in its
broader forms that are most important to investors and listed companies.”8

Numerous indicia demonstrate the competitive nature of this market. For
example, clear substitutes to the Exchange exist in the market for equity security
transaction services. The Exchange is only one of several equity venues to which market
participants may direct their order flow. Competing equity exchanges offer similar tiered
pricing structures to that of the Exchange, including schedules of rebates and fees that
apply based upon members achieving certain volume thresholds.

Within this environment, market participants can freely and often do shift their
order flow among the Exchange and competing venues in response to changes in their
respective pricing schedules. Within the foregoing context, the proposal represents a

7  NetCoalition v. SEC, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities
(December 9, 2008) (SR-NYSEArca-2006-21)).
8  Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499
(June 29, 2005) (“Regulation NMS Adopting Release”).
reasonable attempt by the Exchange to increase its liquidity and market share relative to its competitors.

The Exchange has designed its proposed new credit to provide increased overall incentives to members to increase their liquidity adding and removal activity on the Exchange, and their execution activity in midpoint and M-ELO orders. An increase in liquidity adding and removal activity on the Exchange will, in turn, improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

The Exchange notes that those market participants that are dissatisfied with the new credit are free to shift their order flow to competing venues that offer them lower charges or higher credits.

The Proposal is an Equitable Allocation of Credits

The Exchange believes its proposal will allocate its credits fairly among its market participants. It is equitable for the Exchange to establish the proposed new credit as a means of incentivizing members to provide and remove meaningful amounts of liquidity to the Exchange, including in midpoint and M-ELO orders. To the extent that the Exchange succeeds in increasing overall activity on the Exchange, including in midpoint and M-ELO orders, then the Exchange would experience improvements in its market quality, which would benefit all market participants.

Any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

The Proposed Credit is not Unfairly Discriminatory
The Exchange believes that the proposal is not unfairly discriminatory. As an initial matter, the Exchange believes that nothing about its volume-based tiered pricing model is inherently unfair; instead, it is a rational pricing model that is well-established and ubiquitous in today’s economy among firms in various industries – from co-branded credit cards to grocery stores to cellular telephone data plans – that use it to reward the loyalty of their best customers that provide high levels of business activity and incent other customers to increase the extent of their business activity. It is also a pricing model that the Exchange and its competitors have long employed with the assent of the Commission. It is fair because it incentivizes customer activity that increases liquidity, enhances price discovery, and improves the overall quality of the equity markets.

Moreover, the Exchange believes that its new proposed credit is not unfairly discriminatory because it stands to improve the overall market quality of the Exchange, to the benefit of all market participants, by incentivizing members to provide and remove meaningful amounts of liquidity.

Finally, any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

4. **Self-Regulatory Organization’s Statement on Burden on Competition**

   The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.
Intramarket Competition

The Exchange does not believe that its proposal will place any category of Exchange participant at a competitive disadvantage. To the contrary, the proposed change will provide an opportunity for members to receive a higher credit based upon their market-improving behavior. Any member may elect to provide the levels of market activity required in order to receive the new credit. Furthermore, all members of the Exchange will benefit from any increase in market activity that the proposals effectuates.

Moreover, members are free to trade on other venues to the extent they believe that the proposed credit is too low or the qualification criteria are not attractive. As one can observe by looking at any market share chart, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. The Exchange notes that the tier structure is consistent with broker-dealer fee practices as well as the other industries, as described above.

Intermarket Competition

The Exchange believes that its proposal will not burden competition because the Exchange’s execution services are completely voluntary and subject to extensive competition both from the multitude of other live exchanges and from off-exchange venues. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and credits to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards.
applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee and credit changes in this market may impose any burden on competition is extremely limited.

The proposed new credit is reflective of this competition because, even as one of the largest U.S. equities exchanges by volume, the Exchange has less than 20% market share, which in most markets could hardly be categorized as having enough market power to burden competition. Moreover, as noted above, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. This is in addition to free flow of order flow to and among off-exchange venues which comprises upwards of 40% of industry volume.

The Exchange’s proposal is pro-competitive in that the Exchange intends for it to increase liquidity adding and removal activity on the Exchange and thereby render the Exchange a more attractive and vibrant venue to market participants.

In sum, if the change proposed herein is unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

5. **Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others**

   No written comments were either solicited or received.

6. **Extension of Time Period for Commission Action**

   Not applicable.
7. **Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)**

Pursuant to Section 19(b)(3)(A)(ii) of the Act, the Exchange has designated this proposal as establishing or changing a due, fee, or other charge imposed by the self-regulatory organization on any person, whether or not the person is a member of the self-regulatory organization, which renders the proposed rule change effective upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

8. **Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission**

Not applicable.

9. **Security-Based Swap Submissions Filed Pursuant to Section 3C of the Act**

Not applicable.

10. **Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing and Settlement Supervision Act**

Not applicable.

11. **Exhibits**

   5. Text of the proposed rule change.

---

SR-NASDAQ-2020-074

EXHIBIT 1

SECURITIES AND EXCHANGE COMMISSION
(Release No. ; File No. SR-NASDAQ-2020-074)

November __, 2020

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend the Exchange’s Transaction Credits at Equity 7, Section 118

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹, and Rule 19b-4 thereunder,² notice is hereby given that on November 2, 2020, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange’s transaction credits at Equity 7, Section 118, as described further below.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its schedule of credits at Equity 7, Section 118, to add a new credit for executing orders in securities in all three Tapes.

Presently, the Exchange offers its members a credit of $0.00295 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.70% or more of Consolidated Volume\(^3\) during the month; (ii) execute 0.20% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market

---

\(^3\) Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.
Center MPIDs. The purpose of this credit is to incent members to engage in substantial volumes of liquidity adding and removal activity on the Exchange during a month and, in particular, to execute a substantial percentage of such volume through the provision of midpoint and Midpoint Extended Life Orders, or “M-ELOs.”

The Exchange now proposes to add a new, higher credit for members that meet similar criteria, albeit with higher volume requirements. Specifically, the Exchange proposes to provide a new credit of $0.00305 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.20% or more of Consolidated Volume4 during the month; (ii) execute 0.40% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market Center MPIDs.

In incentivizing members to increase the extent of their liquidity adding and removal activity on the Exchange, and the extent of their midpoint and M-ELO execution activity on the Exchange, the Exchange intends to improve the overall quality and attractiveness of the market.

**Impact of the Changes**

---

4 Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.
Those participants that act as significant providers and removers of liquidity, and who execute substantial volumes of midpoint and M-ELO orders on the Exchange, will benefit directly from the proposed addition of the new credit. Other participants will also benefit from the new credit insofar as any increase in liquidity adding and removal activity on the Exchange will improve the overall quality of the market, to the benefit of all members.

The Exchange notes that its proposals are not otherwise targeted at or expected to be limited in their applicability to a specific segment of market participants nor will they apply differently to different types of market participants.

2. **Statutory Basis**

The Exchange believes that its proposal is consistent with Section 6(b) of the Act, in general, and further the objectives of Sections 6(b)(4) and 6(b)(5) of the Act, in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposal is also consistent with Section 11A of the Act relating to the establishment of the national market system for securities.

The Proposal is Reasonable

The Exchange’s proposed change to its schedule of credits is reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing

---

6 15 U.S.C. 78f(b)(4) and (5).
determinations in that market. The fact that this market is competitive has long been recognized by the courts. In NetCoalition v. Securities and Exchange Commission, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ … As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’…” 7

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.” 8

Numerous indicia demonstrate the competitive nature of this market. For example, clear substitutes to the Exchange exist in the market for equity security transaction services. The Exchange is only one of several equity venues to which market participants may direct their order flow. Competing equity exchanges offer similar tiered

pricing structures to that of the Exchange, including schedules of rebates and fees that apply based upon members achieving certain volume thresholds.

Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to changes in their respective pricing schedules. Within the foregoing context, the proposal represents a reasonable attempt by the Exchange to increase its liquidity and market share relative to its competitors.

The Exchange has designed its proposed new credit to provide increased overall incentives to members to increase their liquidity adding and removal activity on the Exchange, and their execution activity in midpoint and M-ELO orders. An increase in liquidity adding and removal activity on the Exchange will, in turn, improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

The Exchange notes that those market participants that are dissatisfied with the new credit are free to shift their order flow to competing venues that offer them lower charges or higher credits.

The Proposal is an Equitable Allocation of Credits

The Exchange believes its proposal will allocate its credits fairly among its market participants. It is equitable for the Exchange to establish the proposed new credit as a means of incentivizing members to provide and remove meaningful amounts of liquidity to the Exchange, including in midpoint and M-ELO orders. To the extent that the Exchange succeeds in increasing overall activity on the Exchange, including in
midpoint and M-ELO orders, then the Exchange would experience improvements in its market quality, which would benefit all market participants.

Any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

The Proposed Credit is not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. As an initial matter, the Exchange believes that nothing about its volume-based tiered pricing model is inherently unfair; instead, it is a rational pricing model that is well-established and ubiquitous in today’s economy among firms in various industries – from co-branded credit cards to grocery stores to cellular telephone data plans – that use it to reward the loyalty of their best customers that provide high levels of business activity and incent other customers to increase the extent of their business activity. It is also a pricing model that the Exchange and its competitors have long employed with the assent of the Commission. It is fair because it incentivizes customer activity that increases liquidity, enhances price discovery, and improves the overall quality of the equity markets.

Moreover, the Exchange believes that its new proposed credit is not unfairly discriminatory because it stands to improve the overall market quality of the Exchange, to the benefit of all market participants, by incentivizing members to provide and remove meaningful amounts of liquidity.

Finally, any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.
B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange does not believe that its proposal will place any category of Exchange participant at a competitive disadvantage. To the contrary, the proposed change will provide an opportunity for members to receive a higher credit based upon their market-improving behavior. Any member may elect to provide the levels of market activity required in order to receive the new credit. Furthermore, all members of the Exchange will benefit from any increase in market activity that the proposals effectuates.

Moreover, members are free to trade on other venues to the extent they believe that the proposed credit is too low or the qualification criteria are not attractive. As one can observe by looking at any market share chart, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. The Exchange notes that the tier structure is consistent with broker-dealer fee practices as well as the other industries, as described above.

Intermarket Competition

The Exchange believes that its proposal will not burden competition because the Exchange’s execution services are completely voluntary and subject to extensive competition both from the multitude of other live exchanges and from off-exchange venues. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be
more favorable. In such an environment, the Exchange must continually adjust its fees and credits to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee and credit changes in this market may impose any burden on competition is extremely limited.

The proposed new credit is reflective of this competition because, even as one of the largest U.S. equities exchanges by volume, the Exchange has less than 20% market share, which in most markets could hardly be categorized as having enough market power to burden competition. Moreover, as noted above, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. This is in addition to free flow of order flow to and among off-exchange venues which comprises upwards of 40% of industry volume.

The Exchange’s proposal is pro-competitive in that the Exchange intends for it to increase liquidity adding and removal activity on the Exchange and thereby render the Exchange a more attractive and vibrant venue to market participants.

In sum, if the change proposed herein is unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.
C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act. 9

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or

- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2020-074 on the subject line.

Paper comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2020-074. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (http://www.sec.gov/rules/sro.shtml).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street, NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-NASDAQ-2020-074 and should be submitted on or before [insert date 21 days from publication in the Federal Register].
For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.\textsuperscript{10}

J. Matthew DeLesDernier  
Assistant Secretary

\textsuperscript{10} 17 CFR 200.30-3(a)(12).
The Nasdaq Stock Market LLC Rules

**EQUITY 7 PRICING SCHEDULE**

...  

**Section 118. Nasdaq Market Center Order Execution and Routing**

(a) The following charges shall apply to the use of the order execution and routing services of the Nasdaq Market Center by members for all securities priced at $1 or more that it trades. For purposes of determining a member's shares of liquidity routed, TFTY, MOPB, MOPP, SAVE, SOLV, CART, QDRK, QCST and directed orders are not counted. As used in this section, the term "Consolidated Volume" shall mean the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity.

(1) **Fees for Execution and Routing of Orders in Nasdaq-Listed Securities**
