The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change.

**Partial Amendment**

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> NASDAQ OMX PHLX LLC ("Phlx" or "Exchange") is filing with the Securities and Exchange Commission ("Commission") a proposal to amend Rule 1012 (Series of Options Open for Trading) and Rule 1101A (Terms of Option Contracts) to expand the Short Term Option Program ("STO Program" or "Program")<sup>3</sup> so that the Exchange may: select fifty option classes on which STOs may be opened; list additional STOs within fifty percent (50%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is greater than \$20, or within one hundred percent (100%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is less than or equal to \$20; and add an STO strike price interval of \$2.50 or greater where the strike price is above \$150.

A notice of the proposed rule change for publication in the Federal Register is attached hereto as Exhibit 1 and the text of the proposed rule change is attached as Exhibit 5.

(b) Not applicable.

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> STOs, also known as "weekly options" as well as "Short Term Options", are series in an options class that are approved for listing and trading on the Exchange in which the series are opened for trading on any Thursday or Friday that is a business day and that expire on the Friday of the next business week. If a Thursday or Friday is not a business day, the series may be opened (or shall expire) on the first business day immediately prior to that Thursday or Friday, respectively. See Rules 1000(b)(44), 1000A(b)(16), Commentary .11 to Rule 1012 and Rule 1101A(b)(vi) regarding the STO Program various options.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors of the Exchange (the “Board”) on July 10, 2012. Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action by the Exchange is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to Jurij Trypupenko, Associate General Counsel, NASDAQ OMX Group, at (301) 978-8132.

3. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The purpose of this proposed rule change is to amend Rule 1012 and Rule 1101A to expand the STO Program for non-index and index options so that the Exchange may: select fifty option classes on which STOs may be opened; list additional STOs within fifty percent (50%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is greater than \$20, or within one hundred percent (100%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is less than or equal to \$20; and add an STO strike price interval of \$2.50 or greater where the strike price is above \$150.

The STO Program, which was initiated in 2010,<sup>4</sup> is codified in Commentary .11 to Rule 1012 for non-index options (e.g. equity, currency, and exchange traded fund

---

<sup>4</sup> See Securities Exchange Act Release No. 62296 (June 15, 2010), 75 FR 35115 (June 21, 2010)(SR-Phlx-2010-84)(notice of filing and immediate effectiveness permanently establishing STO Program on the Exchange).

(“ETF”) options) and Rule 1101A(b)(vi) for index options. These sections currently state that after an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day series of options on no more than thirty option classes that expire on the Friday of the following business week that is a business day.<sup>5</sup> In addition to the thirty option class limitation, there is also a limitation that no more than twenty series for each expiration date in those classes that may be opened for trading.<sup>6</sup> Furthermore, the strike price of each short term option has to be fixed with approximately the same number of strike prices being opened above and below the value of the underlying security at about the time that the STOs are initially opened for trading on the Exchange, and with strike prices being within thirty percent (30%) above or below the closing price of the underlying security from the preceding day. The Exchange does not propose to eliminate any of these fundamental limitations to the STO Program. The Exchange proposes only to increase the number of

---

<sup>5</sup> The increase in the number of option issues that could be opened pursuant to the STO Program was approved in 2011. See Securities Exchange Act Release No. 65776 (November 17, 2011), 76 FR 72482 (November 23, 2011)(SR-Phlx-2011-131)(approval order).

<sup>6</sup> However, if Exchange opens less than twenty (20) Short Term Option Series for a Short Term Option Expiration Date, additional series may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened. Any additional strike prices listed by the Exchange shall be within thirty percent (30%) above or below the current price of the underlying security. The Exchange may also open additional strike prices of Short Term Option Series that are more than 30% above or below the current price of the underlying security provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. The opening of the new Short Term Option Series shall not affect the series of options of the same class previously opened. Commentary .11(d) to Rule 1012 and Rule 1101A(b)(vi)(D).

STO classes that may be opened, match the opening of additional STO strikes to what is permissible per the OLPP,<sup>7</sup> and clarify what strike prices increments may be used in the STO Program.

In terms of the strike price intervals, the STO Program currently allows that the interval between strike prices on STOs may be (i) \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the STO Program; or (ii) \$0.50 for classes that trade in one dollar increments in Related non-STOs<sup>8</sup> and that participate in the STO Program. Related non-STO series shall be opened during the week prior to the week that such Related non-STO series expire in the same manner as permitted in Commentary .11 to Rule 1012 and in the same strike price intervals that are permitted in Commentary .11 to Rule 1012.<sup>9</sup>

---

<sup>7</sup> The full name of the OLPP (which is applicable to all option exchanges) is Plan For The Purpose of Developing and Implementing Procedures Designed to Facilitate the Listing and Trading of Standardized Options Submitted Pursuant to Section 11A(a)(3)(B) of the Securities Exchange Act of 1934. With regard to the listing of new series on equity, ETF, or trust issued receipt (“TIRs”) option classes, subsection 3.(g)(i) of the OLPP states, in relevant part, that the exercise price of each option series listed by an exchange that chooses to list a series of options (known as the Series Selecting Exchange) shall be fixed at a price per share which is reasonably close to the price of the underlying equity security, ETF, or TIR at or about the time the Series Selecting Exchange determines to list such series. Except as provided in subparagraphs (ii) through (iv) of the OLPP, if the price of the underlying security is less than or equal to \$20, the Series Selecting Exchange shall not list new option series with an exercise price more than 100% above or below the price of the underlying security. If the price of the underlying security is greater than \$20, the Series Selecting Exchange shall not list new option series with an exercise price more than 50% above or below the price of the underlying security.

<sup>8</sup> Related non-STOs are non-STOs that have like options with a longer expiration cycles (e.g. monthly RUT options would be Related non-STOs to weekly RUT options).

<sup>9</sup> Commentary .11(e) to Rule 1012 and Rule 1101A(b)(vi)(E).

Similarly to the above-noted fundamental limitations of the STO Program, this proposal does not get rid of or in any way affect the STO strike price intervals.

#### The Proposal

First, the Exchange proposes to increase the number of STO classes that may be opened after an option class has been approved for listing and trading on the Exchange. Specifically, the Exchange proposes in Commentary .11(a) of Rule 1012 and Rule 1101A(b)(vi)(A) that the Exchange may select up to fifty currently listed option classes on which Short Term Option Series may be opened.<sup>10</sup> The Exchange believes that this proposed moderate increase is needed and advisable in light of the demonstrated acceptance and popularity of the STO Program among market participants, as discussed below.

Second, the Exchange proposes to clarify under what circumstances, subsequent to opening initial STO classes, additional STO strike prices may be added. Specifically, the Exchange proposes in Commentary .11(d) of Rule 1012 and Rule 1101A(b)(vi)(D) that any additional strike prices listed by the Exchange shall be as follows: (i) if the price of the underlying index is less than or equal to \$20, additional strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying index; and (ii) if the price of the underlying index is greater than \$20, the additional strike prices shall be not more than fifty percent (50%) above or below the price of the underlying index. This proposal is in line with the process for adding new series of options found in

---

<sup>10</sup> For proposed rule changes regarding weekly index options pursuant to Rule 1101A(b)(vi), throughout this filing the reference is to index option classes and series.

subsection 3.(g)(i) of the OLPP, and is a reasonable and desirable enhancement to the STO Program.

Third, the Exchange proposes to add \$2.50 strike price intervals to the STO Program. Specifically, the Exchange proposes in Commentary .11(e) of Rule 1012 and Rule 1101A(b)(vi)(E) to indicate that the interval between strike prices on STOs may be \$2.50 or greater where the strike price is above \$150. This proposed change complements the current STO strike price intervals, which are \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the STO Program.<sup>11</sup> The proposed \$2.50 strike price interval corrects the issue that above a \$150 strike price STO strike price intervals must currently be an exceedingly wide \$5.00 or greater.<sup>12</sup>

The principal reason for the proposed expansion is market demand for additional STO classes and series and a desire to make the STO Program more effective. There is continuing strong customer demand for having the ability to execute hedging and trading strategies via STOs, particularly in the current fast and volatile multi-faceted trading and investing environment that extends across numerous markets and platforms<sup>13</sup> and includes market moving events such as significant market volatility, corporate events, or large market, sector, or individual issue price swings. The Exchange has been requested

---

<sup>11</sup> STO strike price intervals may also be in \$1 increments in Related non-Short Term Options that participate in the STO Program. This requirement, like all other STO requirements, is similar for index options and non-index options. Commentary .11 of Rule 1012 and Rule 1101A(b)(vi).

<sup>12</sup> See, e.g., Commentary .05 to Rule 1012 and Rule 1101A.

<sup>13</sup> These include, without limitation, options, equities, futures, derivatives, indexes, exchange traded funds, exchange traded notes, currencies, and over the counter instruments.

by traders and other market participants to expand the STO Program to allow additional STO offerings and increased efficiency.

In order that the Exchange not exceed the current thirty option class and twenty option series restriction, the Exchange has on occasion had to turn away STO customers (traders and investors) because it could not list, or had to delist, STOs or could not open adequate STO Series because of restrictions in the STO Program. This has negatively impacted investors and traders, particularly retail public customers, who have continued to request the Exchange not to remove short term option classes or add short term option classes, or have requested the Exchange to expand the STO Program so that additional STO classes and series could be opened that would allow the market participants to execute trading and hedging strategies.<sup>14</sup> There are, as discussed, substantial benefits to market participants having the ability to trade eligible option classes within the STO Program at correct strike price intervals. Furthermore, the Exchange supports the objective of responding to customer need to enhance successful programs to make them more efficient for hedging and trading purposes.

The Exchange notes that the STO Program has been well-received by market participants, in particular by retail investors. The volume of STO trading has increased

---

<sup>14</sup> The Exchange noted, in its STO Program expansion proposal in 2011, that it was requested by a retail investor to reinstate a short term option class that the Exchange had to remove from trading because of the class option limitation within the Program. The investor told the Exchange that he had used the removed class as a powerful tool for hedging a market sector, and that various strategies that the investor put into play were disrupted and eliminated when the class was removed. See Securities Exchange Act Release No. 65776 (November 17, 2011), 76 FR 72482 (November 23, 2011)(SR-Phlx-2011-131)(order approving opening STO series on 30 option classes).

by 132% since the beginning of 2011<sup>15</sup> and continues to grow, such that currently STOs represent 20% of trading volume on the Exchange and 31% of trading volume across all option exchanges.<sup>16</sup> The Exchange believes that weekly expiration options will continue to grow in importance for all market participants, including institutional and retail investors. The proposed revisions to the STO Program will permit the Exchange to meet customer demand for better STO Program use and efficiency, harmonization of OLPP and STO Program rules, and a reasonable expansion of strike price intervals in the Program.

By way of example, if an investor wants to gain exposure to a relatively higher priced security like Apple (AAPL), he may invest in AAPL stock and/or AAPL options. Currently, the investor must choose a strike price that might lack the precision he is looking for in order to gain or reduce exposure to AAPL. If the investor is looking to invest in a long position in AAPL, for example, he may choose to execute a covered call strategy by selling calls on AAPL. Assume AAPL is trading at \$415. Under the current rules the nearest out-of-the-money STO call would be the \$420.00 strike, which would, with one week until expiration, trade at or about \$2.15. If the \$417.50 strike were available per this proposal, however, the investor could sell calls at approximately \$3.15. This would allow the investor to still execute an out of the money covered call strategy, but would increase the potential return by \$1, or 46% ( $\$1/\$2.15$ ), thus offering 46% additional risk protection. To the investor writing covered calls on his AAPL equity

---

<sup>15</sup> Since the STO Program was initiated in 2010 on the Exchange and other markets (some of which were established after the STO Program was initiated), STO Program volume expanded by more than 3000%.

<sup>16</sup> During the same period of time, however, the volume of standard monthly options across all exchanges has, on the other hand, declined by 28%.

position, this extra risk protection could be very significant on an annual basis, and costly if not available.

Furthermore, STO option fragmentation because of an overly constrictive STO Program may cause confusion for retail customers and discourage them from using complex STO orders where they could be the most advantageous for effective execution of trading and hedging strategies. The Exchange believes that it is essential that such negative, potentially costly and time-consuming impacts on retail investors and other market participants are eliminated by modestly expanding the Program to enable additional classes and series to be traded. The change proposed by the Exchange should greatly minimize the potential fragmented nature of the STO Program and allow execution of more trading and hedging strategies on the Exchange.<sup>17</sup>

With regard to the impact of this proposal on system capacity, the Exchange has analyzed its capacity and represents that it and the Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle any potential additional traffic associated with this current amendment to the STO Program. The Exchange believes that its members will not have a capacity issue as a result of this proposal. The Exchange represents that it will monitor the trading volume associated with the additional options series listed as a result of this proposal and the effect (if any) of these additional series on market fragmentation and on the capacity of the Exchange's automated systems.

---

<sup>17</sup> Moreover, the proposal would enable the Exchange to provide market participants with an opportunity to execute, for example, a complex trading or hedging strategy wholly on the Exchange - thereby minimizing the potential increased cost of executing parts of the strategy on different exchanges while diminishing the potential for foregone market opportunity on the Exchange.

b. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act<sup>18</sup> in general, and furthers the objectives of Section 6(b)(5) of the Act<sup>19</sup> in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Expanding the classes and additional series that can be opened in the STO Program and allowing \$2.50 strike price intervals will result in a continuing benefit to investors by giving them more flexibility to closely tailor their investment and hedging decisions in greater number of securities.

The STO Program has been well-received by market participants, and in particular by retail investors, and has seen increasing trading volume. The Exchange believes that the current proposed revisions to the STO Program will permit the Exchange to meet customer demand for enhanced STO Program use and efficiency, harmonization of OLPP and STO Program rules, and a reasonable expansion of strike price intervals in the Program to the benefit of investors, market participants, and the marketplace.

4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposal is decidedly pro-

---

<sup>18</sup> 15 U.S.C. 78f(b).

<sup>19</sup> 15 U.S.C. 78f(b)(5).

competitive. The Exchange believes that the proposed rule change will result in additional investment options and opportunities to achieve the investment objectives of market participants seeking efficient trading and hedging vehicles, to the benefit of investors, market participants, and the marketplace in general.

**EXHIBIT 1**

SECURITIES AND EXCHANGE COMMISSION  
(Release No. \_\_\_\_\_ ; File No. SR-Phlx-2013-75)

July \_\_, 2013

Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Regarding the Short Term Option Series Program

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)<sup>1</sup>, and Rule 19b-4<sup>2</sup> thereunder, notice is hereby given that on July 12, 2013, NASDAQ OMX PHLX LLC (“Phlx” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposal to amend amend Rule 1012 (Series of Options Open for Trading) and Rule 1101A (Terms of Option Contracts) to expand the Short Term Option Program (“STO Program” or “Program”)<sup>3</sup> so that the Exchange may: select fifty option classes on which STOs may be opened; list additional

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> STOs, also known as “weekly options” as well as “Short Term Options”, are series in an options class that are approved for listing and trading on the Exchange in which the series are opened for trading on any Thursday or Friday that is a business day and that expire on the Friday of the next business week. If a Thursday or Friday is not a business day, the series may be opened (or shall expire) on the first business day immediately prior to that Thursday or Friday, respectively. See Rules 1000(b)(44), 1000A(b)(16), Commentary .11 to Rule 1012 and Rule 1101A(b)(vi) regarding the STO Program various options.

STOs within fifty percent (50%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is greater than \$20, or within one hundred percent (100%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is less than or equal to \$20; and add an STO strike price interval of \$2.50 or greater where the strike price is above \$150.

The text of the proposed rule change is available on the Exchange's Website at <http://nasdaqomxphlx.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to amend Rule 1012 and Rule 1101A to expand the STO Program for non-index and index options so that the Exchange may: select fifty option classes on which STOs may be opened; list additional STOs within fifty percent (50%) above or below the closing price of the underlying security from the preceding day if the price of the underlying security is greater than \$20, or within one hundred percent (100%) above or below the closing price of the underlying security from

the preceding day if the price of the underlying security is less than or equal to \$20; and add an STO strike price interval of \$2.50 or greater where the strike price is above \$150.

The STO Program, which was initiated in 2010,<sup>4</sup> is codified in Commentary .11 to Rule 1012 for non-index options (e.g. equity, currency, and exchange traded fund (“ETF”) options) and Rule 1101A(b)(vi) for index options. These sections currently state that after an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day series of options on no more than thirty option classes that expire on the Friday of the following business week that is a business day.<sup>5</sup> In addition to the thirty option class limitation, there is also a limitation that no more than twenty series for each expiration date in those classes that may be opened for trading.<sup>6</sup> Furthermore, the strike price of each short term

---

<sup>4</sup> See Securities Exchange Act Release No. 62296 (June 15, 2010), 75 FR 35115 (June 21, 2010)(SR-Phlx-2010-84)(notice of filing and immediate effectiveness permanently establishing STO Program on the Exchange).

<sup>5</sup> The increase in the number of option issues that could be opened pursuant to the STO Program was approved in 2011. See Securities Exchange Act Release No. 65776 (November 17, 2011), 76 FR 72482 (November 23, 2011)(SR-Phlx-2011-131)(approval order).

<sup>6</sup> However, if Exchange opens less than twenty (20) Short Term Option Series for a Short Term Option Expiration Date, additional series may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened. Any additional strike prices listed by the Exchange shall be within thirty percent (30%) above or below the current price of the underlying security. The Exchange may also open additional strike prices of Short Term Option Series that are more than 30% above or below the current price of the underlying security provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. The opening of the new Short Term Option Series shall not affect the series of options of the same class previously opened. Commentary .11(d) to Rule 1012 and Rule 1101A(b)(vi)(D).

option has to be fixed with approximately the same number of strike prices being opened above and below the value of the underlying security at about the time that the STOs are initially opened for trading on the Exchange, and with strike prices being within thirty percent (30%) above or below the closing price of the underlying security from the preceding day. The Exchange does not propose to eliminate any of these fundamental limitations to the STO Program. The Exchange proposes only to increase the number of STO classes that may be opened, match the opening of additional STO strikes to what is permissible per the OLPP,<sup>7</sup> and clarify what strike prices increments may be used in the STO Program.

In terms of the strike price intervals, the STO Program currently allows that the interval between strike prices on STOs may be (i) \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the STO Program; or (ii) \$0.50 for classes that trade in one

---

<sup>7</sup> The full name of the OLPP (which is applicable to all option exchanges) is Plan For The Purpose of Developing and Implementing Procedures Designed to Facilitate the Listing and Trading of Standardized Options Submitted Pursuant to Section 11A(a)(3)(B) of the Securities Exchange Act of 1934. With regard to the listing of new series on equity, ETF, or trust issued receipt (“TIRs”) option classes, subsection 3.(g)(i) of the OLPP states, in relevant part, that the exercise price of each option series listed by an exchange that chooses to list a series of options (known as the Series Selecting Exchange) shall be fixed at a price per share which is reasonably close to the price of the underlying equity security, ETF, or TIR at or about the time the Series Selecting Exchange determines to list such series. Except as provided in subparagraphs (ii) through (iv) of the OLPP, if the price of the underlying security is less than or equal to \$20, the Series Selecting Exchange shall not list new option series with an exercise price more than 100% above or below the price of the underlying security. If the price of the underlying security is greater than \$20, the Series Selecting Exchange shall not list new option series with an exercise price more than 50% above or below the price of the underlying security.

dollar increments in Related non-STOs<sup>8</sup> and that participate in the STO Program. Related non-STO series shall be opened during the week prior to the week that such Related non-STO series expire in the same manner as permitted in Commentary .11 to Rule 1012 and in the same strike price intervals that are permitted in Commentary .11 to Rule 1012.<sup>9</sup> Similarly to the above-noted fundamental limitations of the STO Program, this proposal does not get rid of or in any way affect the STO strike price intervals.

### The Proposal

First, the Exchange proposes to increase the number of STO classes that may be opened after an option class has been approved for listing and trading on the Exchange. Specifically, the Exchange proposes in Commentary .11(a) of Rule 1012 and Rule 1101A(b)(vi)(A) that the Exchange may select up to fifty currently listed option classes on which Short Term Option Series may be opened.<sup>10</sup> The Exchange believes that this proposed moderate increase is needed and advisable in light of the demonstrated acceptance and popularity of the STO Program among market participants, as discussed below.

Second, the Exchange proposes to clarify under what circumstances, subsequent to opening initial STO classes, additional STO strike prices may be added. Specifically, the Exchange proposes in Commentary .11(d) of Rule 1012 and Rule 1101A(b)(vi)(D)

---

<sup>8</sup> Related non-STOs are non-STOs that have like options with a longer expiration cycles (e.g. monthly RUT options would be Related non-STOs to weekly RUT options).

<sup>9</sup> Commentary .11(e) to Rule 1012 and Rule 1101A(b)(vi)(E).

<sup>10</sup> For proposed rule changes regarding weekly index options pursuant to Rule 1101A(b)(vi), throughout this filing the reference is to index option classes and series.

that any additional strike prices listed by the Exchange shall be as follows: (i) if the price of the underlying index is less than or equal to \$20, additional strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying index; and (ii) if the price of the underlying index is greater than \$20, the additional strike prices shall be not more than fifty percent (50%) above or below the price of the underlying index. This proposal is in line with the process for adding new series of options found in subsection 3.(g)(i) of the OLPP, and is a reasonable and desirable enhancement to the STO Program.

Third, the Exchange proposes to add \$2.50 strike price intervals to the STO Program. Specifically, the Exchange proposes in Commentary .11(e) of Rule 1012 and Rule 1101A(b)(vi)(E) to indicate that the interval between strike prices on STOs may be \$2.50 or greater where the strike price is above \$150. This proposed change complements the current STO strike price intervals, which are \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the STO Program.<sup>11</sup> The proposed \$2.50 strike price interval corrects the issue that above a \$150 strike price STO strike price intervals must currently be an exceedingly wide \$5.00 or greater.<sup>12</sup>

The principal reason for the proposed expansion is market demand for additional STO classes and series and a desire to make the STO Program more effective. There is continuing strong customer demand for having the ability to execute hedging and trading

---

<sup>11</sup> STO strike price intervals may also be in \$1 increments in Related non-Short Term Options that participate in the STO Program. This requirement, like all other STO requirements, is similar for index options and non-index options. Commentary .11 of Rule 1012 and Rule 1101A(b)(vi).

<sup>12</sup> See, e.g., Commentary .05 to Rule 1012 and Rule 1101A.

strategies via STOs, particularly in the current fast and volatile multi-faceted trading and investing environment that extends across numerous markets and platforms<sup>13</sup> and includes market moving events such as significant market volatility, corporate events, or large market, sector, or individual issue price swings. The Exchange has been requested by traders and other market participants to expand the STO Program to allow additional STO offerings and increased efficiency.

In order that the Exchange not exceed the current thirty option class and twenty option series restriction, the Exchange has on occasion had to turn away STO customers (traders and investors) because it could not list, or had to delist, STOs or could not open adequate STO Series because of restrictions in the STO Program. This has negatively impacted investors and traders, particularly retail public customers, who have continued to request the Exchange not to remove short term option classes or add short term option classes, or have requested the Exchange to expand the STO Program so that additional STO classes and series could be opened that would allow the market participants to execute trading and hedging strategies.<sup>14</sup> There are, as discussed, substantial benefits to market participants having the ability to trade eligible option classes within the STO

---

<sup>13</sup> These include, without limitation, options, equities, futures, derivatives, indexes, exchange traded funds, exchange traded notes, currencies, and over the counter instruments.

<sup>14</sup> The Exchange noted, in its STO Program expansion proposal in 2011, that it was requested by a retail investor to reinstate a short term option class that the Exchange had to remove from trading because of the class option limitation within the Program. The investor told the Exchange that he had used the removed class as a powerful tool for hedging a market sector, and that various strategies that the investor put into play were disrupted and eliminated when the class was removed. See Securities Exchange Act Release No. 65776 (November 17, 2011), 76 FR 72482 (November 23, 2011)(SR-Phlx-2011-131)(order approving opening STO series on 30 option classes).

Program at correct strike price intervals. Furthermore, the Exchange supports the objective of responding to customer need to enhance successful programs to make them more efficient for hedging and trading purposes.

The Exchange notes that the STO Program has been well-received by market participants, in particular by retail investors. The volume of STO trading has increased by 132% since the beginning of 2011<sup>15</sup> and continues to grow, such that currently STOs represent 20% of trading volume on the Exchange and 31% of trading volume across all option exchanges.<sup>16</sup> The Exchange believes that weekly expiration options will continue to grow in importance for all market participants, including institutional and retail investors. The proposed revisions to the STO Program will permit the Exchange to meet customer demand for better STO Program use and efficiency, harmonization of OLPP and STO Program rules, and a reasonable expansion of strike price intervals in the Program.

By way of example, if an investor wants to gain exposure to a relatively higher priced security like Apple (AAPL), he may invest in AAPL stock and/or AAPL options. Currently, the investor must choose a strike price that might lack the precision he is looking for in order to gain or reduce exposure to AAPL. If the investor is looking to invest in a long position in AAPL, for example, he may choose to execute a covered call strategy by selling calls on AAPL. Assume AAPL is trading at \$415. Under the current rules the nearest out-of-the-money STO call would be the \$420.00 strike, which would,

---

<sup>15</sup> Since the STO Program was initiated in 2010 on the Exchange and other markets (some of which were established after the STO Program was initiated), STO Program volume expanded by more than 3000%.

<sup>16</sup> During the same period of time, however, the volume of standard monthly options across all exchanges has, on the other hand, declined by 28%.

with one week until expiration, trade at or about \$2.15. If the \$417.50 strike were available per this proposal, however, the investor could sell calls at approximately \$3.15. This would allow the investor to still execute an out of the money covered call strategy, but would increase the potential return by \$1, or 46% ( $\$1/\$2.15$ ), thus offering 46% additional risk protection. To the investor writing covered calls on his AAPL equity position, this extra risk protection could be very significant on an annual basis, and costly if not available.

Furthermore, STO option fragmentation because of an overly constrictive STO Program may cause confusion for retail customers and discourage them from using complex STO orders where they could be the most advantageous for effective execution of trading and hedging strategies. The Exchange believes that it is essential that such negative, potentially costly and time-consuming impacts on retail investors and other market participants are eliminated by modestly expanding the Program to enable additional classes and series to be traded. The change proposed by the Exchange should greatly minimize the potential fragmented nature of the STO Program and allow execution of more trading and hedging strategies on the Exchange.<sup>17</sup>

With regard to the impact of this proposal on system capacity, the Exchange has analyzed its capacity and represents that it and the Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle any potential additional traffic associated with this current amendment to the STO Program. The Exchange believes that

---

<sup>17</sup> Moreover, the proposal would enable the Exchange to provide market participants with an opportunity to execute, for example, a complex trading or hedging strategy wholly on the Exchange - thereby minimizing the potential increased cost of executing parts of the strategy on different exchanges while diminishing the potential for foregone market opportunity on the Exchange.

its members will not have a capacity issue as a result of this proposal. The Exchange represents that it will monitor the trading volume associated with the additional options series listed as a result of this proposal and the effect (if any) of these additional series on market fragmentation and on the capacity of the Exchange's automated systems.

## 2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act<sup>18</sup> in general, and furthers the objectives of Section 6(b)(5) of the Act<sup>19</sup> in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Expanding the classes and additional series that can be opened in the STO Program and allowing \$2.50 strike price intervals will result in a continuing benefit to investors by giving them more flexibility to closely tailor their investment and hedging decisions in greater number of securities.

The STO Program has been well-received by market participants, and in particular by retail investors, and has seen increasing trading volume. The Exchange believes that the current proposed revisions to the STO Program will permit the Exchange to meet customer demand for enhanced STO Program use and efficiency, harmonization of OLPP and STO Program rules, and a reasonable expansion of strike price intervals in the Program to the benefit of investors, market participants, and the marketplace.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposal is decidedly pro-competitive. The Exchange believes that the proposed rule change will result in additional investment options and opportunities to achieve the investment objectives of market participants seeking efficient trading and hedging vehicles, to the benefit of investors, market participants, and the marketplace in general.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-Phlx-2013-75 on the subject line.

Paper comments:

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-Phlx-2013-75. This file number should be included on the subject line if e-mail is used.

To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-Phlx-2013-75 and should be submitted on or before [insert date 21 days from publication in the Federal Register].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>20</sup>

Kevin M. O'Neill  
Deputy Secretary

**Options Rules**

\* \* \* \* \*

**Rule 1012. Series of Options Open for Trading**

(a) – (d) No Change.

• • • *Commentary:* -----

**.01 – .10** No Change.

**.11** Short Term Option Series Program. After an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day ("Short Term Option Opening Date") series of options on that class that expire on the Friday of the following business week that is a business day ("Short Term Option Expiration Date"). If the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on the Friday of the following business week, the Short Term Option Expiration Date will be the first business day immediately prior to that Friday. Regarding Short Term Option Series:

(a) The Exchange may select up to [thirty]fifty ([30]50) currently listed option classes on which Short Term Option Series may be opened on any Short Term Option Opening Date. In addition to the thirty-option class restriction, the Exchange also may list Short Term Option Series on any option classes that are selected by other securities exchanges that employ a similar program under their respective rules. For each option class eligible for participation in the Short Term Option Series Program, the Exchange may open up to twenty (20) Short Term Option Series for each expiration date in that class. The Exchange may also open Short Term Option Series that are opened by other securities exchanges in option classes selected by such exchanges under their respective short term option rules.

(b) No Short Term Option Series may expire in the same week in which monthly option series on the same class expire or, in the case of Quarterly Options Series, on an expiration that coincides with an expiration of Quarterly Option Series on the same class.

(c) The strike price of each Short Term Option Series will be fixed at a price per share, with approximately the same number of strike prices being opened above and below the value of the underlying security at about the time that the Short Term Option Series are initially opened for trading on the Exchange (e.g., if seven

(7) series are initially opened, there will be at least three (3) strike prices above and three (3) strike prices below the value of the underlying security). Any strike prices listed by the Exchange shall be within thirty percent (30%) above or below the closing price of the underlying security from the preceding day.

(d) If the Exchange opens less than twenty (20) Short Term Option Series for a Short Term Option Expiration Date, additional series may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened.

Any additional strike prices listed by the Exchange shall be [within thirty percent (30%) above or below the current price of the underlying security.]listed as follows: (i) if the price of the underlying security is less than or equal to \$20, additional strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying security; and (ii) if the price of the underlying security is greater than \$20, the additional strike prices shall be not more than fifty percent (50%) above or below the price of the underlying security.

[The Exchange may also open additional strike prices of Short Term Option Series that are more than 30% above or below the current price of the underlying security provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. ]The opening of the new Short Term Option Series shall not affect the series of options of the same class previously opened.

(e) The interval between strike prices on Short Term Option Series may be (i) \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the Short Term Options Series Program; [or ](ii) \$0.50 for classes that trade in one dollar increments in Related non-Short Term Options and that participate in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150. Related non-Short Term Option series shall be opened during the week prior to the week that such Related non-Short Term Option series expire in the same manner as permitted in Commentary .11 to this Rule 1012 and in the same strike price intervals that are permitted in Commentary .11 to this Rule 1012.

**.12 - 13**                      No Change.

\* \* \* \* \*

#### **Rule 1101A. Terms of Option Contracts**

(a)                      No Change.

(b) No Change.

(i) – (v) No Change.

**(vi) Short Term Option Series Program**

After an index option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day ("Short Term Option Opening Date") series of options on that class that expire on the Friday of the following business week that is a business day ("Short Term Option Expiration Date"). If the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on the Friday of the following business week, the Short Term Option Expiration Date will be the first business day immediately prior to that Friday. Regarding Short Term Option Series:

(A) The Exchange may select up to [thirty]fifty ([30]50) currently listed option classes on which Short Term Option Series may be opened on any Short Term Option Opening Date. In addition to the thirty-option class restriction, the Exchange also may list Short Term Option Series on any option classes that are selected by other securities exchanges that employ a similar program under their respective rules. For each index option class eligible for participation in the Short Term Option Series Program, the Exchange may open up to twenty (20) Short Term Option Series on index options for each expiration date in that class. The Exchange may also open Short Term Option Series that are opened by other securities exchanges in option classes selected by such exchanges under their respective short term option rules.

(B) No Short Term Option Series on an index option class may expire in the same week during which any monthly option series on the same index class expire or, in the case of Quarterly Options Series, on an expiration that coincides with an expiration of Quarterly Option Series on the same index class.

(C) The strike price of each Short Term Option Series will be fixed at a price per share, with approximately the same number of strike prices being opened above and below the calculated value of the underlying index at about the time that the Short Term Option Series are initially opened for trading on the Exchange (e.g., if seven (7) series are initially opened, there will be at least three (3) strike prices above and three (3) strike prices below the value of the underlying security or calculated index value). Any strike prices listed by the Exchange shall be within thirty percent (30%) above or below the current value of the underlying index.

(D) If the Exchange has opened less than twenty (20) Short Term Option Series for a Short Term Option Expiration Date, additional series may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the current value of the underlying index moves substantially from the exercise price or prices of the series already opened.

Any additional strike prices listed by the Exchange shall be [within thirty percent (30%) above or below the current value of the underlying index.] as follows: (i) if the price of the underlying index is less than or equal to \$20, additional strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying index; and (ii) if the price of the underlying index is greater than \$20, the additional strike prices shall be not more than fifty percent (50%) above or below the price of the underlying index.

[The Exchange may also open additional strike prices of Short Term Option Series that are more than 30% above or below the current value of the underlying index provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. ]The opening of the new Short Term Option Series shall not affect the series of options of the same class previously opened.

(E) The interval between strike prices on Short Term Option Series may be (1) \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all index classes that participate in the Short Term Option Series Program; [or ](2) \$0.50 for index classes that trade in one dollar increments in Related non-Short Term Options and that participate in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150. Related non-Short Term Option series shall be opened during the week prior to the week that such Related non-Short Term Option series expire in the same manner as permitted in Rule 1101A(b)(vi) and in the same strike price intervals that are permitted in this Rule 1101A(b)(vi).

(c) No Change.
